Thread: [\\$1200 PC Build Needed for Gaming, Streaming and Editing](#)

GTATrix - September 3, 2019, 10:19 pm

I am looking to build a PC for things like Gaming, Streaming, Graphic Design and Editing. I listed games and programs for each below to give a better idea of what I am going to use the PC for.

Gaming: CSGO, GTA, Fortnite, COD, Witcher 3, etc...

Design: Photoshop, Illustrator

Editing: Premiere, After Effects

My budget is \$1200 but I can go up to \$1250 if absolutely necessary. I've had friends recommend me Intel and AMD builds but I am still unsure which to get. I am just looking for the best possible build for this budget. Any help is highly appreciated!

akela4you - September 4, 2019, 1:50 am

intel is somehow better but is more expensive ,Amd is good i think :)i have amd and is ok
search Asus motherboard with at least 32gb Ram and then AMD procesors and nvidia graphic card
Hd search for SSD isnt so hard
u can do it yourself
