Thread: [FREE Web Dev | I will build you a website for FREE \(limited people\)](#)

**FreeCoder** - September 4, 2019, 4:46 am

Hi! I'm looking to build my webportfolio, and am currently building free websites for a limited number of clients. If you're interested you can DM me.

First come, fist serve!

I look forward to working with you.

By build do you mean use a cms or would you be building from scratch?

Hi,

By build I mean using a content management system. I'm able to build a framework and build a website from scratch (from front to backend, including security etc) but this would be total overkill when done for free. This is a simple but good looking informational website that runs on the wordpress cms.

Hope that answers your question.

Not sure if you should be teaching someone about hacking if you can't easily build a website

yourself.

This is interesting, I was looking for a web dev.  
would pay.

**Jesus Loves u** - *September 7, 2019, 10:43 am*

Can you help me editing an existing website

**Venture** - *September 7, 2019, 5:31 pm*

If you're doing this could we setup a project like ebay that uses cryptocurrency via cryptopayments
