Thread: [Chat anonymously on phone](#)

SIM-2827903 - September 4, 2019, 7:15 am

I am going to buy a second phone for only anonymous chatting..

Any tips or tricks how to chat anonymously as possible on the phone? Was thinking of getting samsung touch phone.. not of those old nokias ?

To chat anonymous on ur phone i think you should install a new custom android os without any google app on it, all traffic on tor and vpn,using encryption AES and maybe Wickr or another chat which use encryption

I am abit outdated on all this blackhat stuff...

So install a custom android os, and use vpn, then chat on wickr?

What does encryption AES mean?

That was my opinon because its very hard to be 100% secured on smartphones today because they are all monitored and backdoored etc.

Yes install a custom android on on your phone and use TOR + VPN and chat on wickr and your securirty will increase.

You shouldn't have any google app installed on your phone remember that, they are spying and selling your privat information.

AES encryption its very strong encryption that means if use an chat app which use strong encryption like AES or SHA256 your messages will be strong encrypted to be monitored or to decrypt it (sorry for my bad english)

If you need to be that secure buy an Encro.

Or if it aint that serious just use Wickr or Telegram, and if you need to speak on the phone call through Whatsapp rather than calling using the sim.

Thanks

I ended up with a phone with only wickr and vpn installed... No sim card
