Thread: [Dyncheck vs Run4Me](#)

AnonFawkes - September 6, 2019, 12:06 am

Which service provides more accurate results?

DynCheck or Run4me?

ty

DynCheck and Run4Me are Runtime scanners.

Cyberscan and antiscan.me are Scantime scanners.

Im interested in the runtime results.

Well you can go with Dyncheck

But scanners dont give best results,I have 5 virtual machines with 5 antivirus which i use in testing for runtime detections and its the best

Nauhsea - September 6, 2019, 2:12 am

Doing runtime checks manually would be the go to honestly, there's so much controversy over whether non distributing scanners provide real results. But hypothetically if I had to choose between the two it would be DynCheck without a doubt!

Get a VM and test yourself, if you are that much "curious".
