Geekbench:

<https://browser.geekbench.com/v4/cpu/14990663>

I am not vouching for this product nor am I recommending you buy it. These tests are unbiased. Here is my personal opinion:

Network Speed: 4/10 -- This speedtest shown above is actually the highest I was able to reproduce. Did many other speed tests the day before with not so great results. The VPS is also quite laggy in SSH, sometimes freezing up.

I/O : 4/10 - Server is operating at a low-end HDD's speed

Here's my review of bulletproof.space:

Bought the Bulletproof V3 VPS Package, I was overall pretty happy with the service I've been getting, and you get a pretty good bang for your buck.

Features include:

4GB RAM Memory | CPU 3-4 core | 50GB SSD (RAID 10) | Unmetered traffic /1Gbit/s | Full Root Access

Speed: 8/10 - Server speeds are good, 1gbps is advertised, and yes, it's as advertised. Saw someone's review saying the speeds were bad, I disagree, pretty good.

Communication: 7.5 - The support team is very good, installed my preferred OS for me, and the VPS was delivered within a day.

Ran into a complex networking issue, and sent them a PM, it was fixed within a minute; pretty great

if you ask me.

Value: 9/10 - For the support, speed, and privacy you get - the value you get is pretty great. Would definitely renew my monthly plan.

Overall: 8.5/10

No hosting service is perfect, but these guys go above and beyond to provide a good service for any project you have, and they are quick to fix any issue you might have.

Thanks guys.

4GB RAM Memory | CPU 3-4 core | 50GB SSD (RAID 10) | Unmetered traffic /1Gbit/s | Full Root Access

Speed: 8/10 - Server speeds are good, 1gbps is advertised, and yes, it's as advertised. Saw someone's review saying the speeds were bad, I disagree, pretty good.

Communication: 7.5 - The support team is very good, installed my preferred OS for me, and the VPS was delivered within a day.

Ran into a complex networking issue, and sent them a PM, it was fixed within a minute; pretty great if you ask me.

Value: 9/10 - For the support, speed, and privacy you get - the value you get is pretty great. Would definitely renew my monthly plan.

Overall: 8.5/10

No hosting service is perfect, but these guys go above and beyond to provide a good service for any project you have, and they are quick to fix any issue you might have.

Thanks guys.

Thanks for the nice words and your feedback!

You received a ready server on the first day after payment! Scam? We gave you a server a few hours after payment. You did not like him and you asked to replace him. We warned you that you will have to wait for the new server. Expect a server. As soon as it is ready - we will send the data to you by telegram. It's not worth clogging my topic with correspondence that can be sent to telegram.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
