Thread: [REAL dark net Links](#)

MrRicky - September 7, 2019, 3:30 am

I've seen a lot of people who've posted dark net links around here, and I want to say something about it,

DON'T USE THEM

they could be phishing links

Use Dark.fail It's a collection of the most popular markets and forums

Proof that Dark.fail is legit

[Is dark.fail legit? : darknet](#)

can confirm dark.fail is real also on there is the onion version.

The only questions erveryone is who is behind dark.fail?

Noone knows the owner.

Also some time in the future the owner might get paid to put phising links on dark.fail but for now its legit.

That's why you always should use pgb as verification

dark.fail is legitimate. Still, use caution, and check on Dread as a secondary source for validation. Any reputable site on there will have a sub-dread and that should contain the verified link.
