Thread: [Free Professional Web Development for 2/3 people.](#)

GoldieGFX - September 7, 2019, 8:14 am

Hi there!

I'm a Web Designer and Developer!

I am looking to make a few free websites for the community if anyone is interested.

I'm building up a personal work portfolio and decided to offer this and probably help someone out with a website, the other option was to make a few examples for myself and just host them and use them. But this way I can benefit someone that might be in a need of web development services.

I'm working this full time and employed for a Web Development company.

Although I am not offering any back end development for free.

- What you get is a Free website, Free Server support, Free backups, and server-side maintenance. The only thing I don't offer is Free web hosting.

If anyone is interested, drop me a PM. I can also send over some work examples.

Cheers !

Hey! Do you have experience in PHP, Composer, javascript to create plugins for Composer based web-apps?

I have a project I could use a hand with. Add me on Discord!

Hi chief !

I'm making an SEO tool for which I'd need a sweet landing page & dashboard, would you be down to work on this with me ?

I will handle the backend, which is basically going to be a lot of SQL requests and AJAX.
