spynote for android v 5 , it's visble the virus
when the victim remove the app ,i lost a victim.
it's the problem to version 5 or problem relative to spynote.
can i get the link to version later for free.

or what's the best paid service resolve the problem.
i want a invisible virus dislocate to the origin app installed.

another question
actually there's a crypt for apk file , or a service crypt my virus to fud , i can pay...
