Thread: [WTS: Auto Related Store \(Return Customers/55% profit margin/ dropship\)](#)

4L CAPONE - September 7, 2019, 12:07 pm

Hey all,

Selling a private label automotive-related store.

Great b2b + consumer diy potential with a product that a certain service will use 3-7 bottles a month.

The big corps are currently charging similar for less than 2.5x - 5x performance we provide.

Couple thousand of the exact service-based business (a lot are trying to find another product due to the main corp literally will sell to every service so no uniqueness for them)

Focusing on the service due to demand in my area of this product (can't handle both) but want to keep wholesale discounts (the service section will remain on the store for myself the appointments are redirected to a different site so no need to log in to shopify.

Will drop ship it for you as well inventory is on the west coast for quick shipping times.

Profit margin is a whopping \$33.75 usd per product sold.

Have a couple of people that are interested in becoming distributors.

First month - \$570 revenue (haven't really pushed ads / been pushing ads for the service mainly)

Close to 800 followers on insta / 5-6 influencers already set up.

Promo vid recently did professionally.

Looking for \$2500 USD (working in the industry myself I know the upside is huge/ first online website (lack marketing/ social media skills))

Or willing to work to be a partner if you can handle marketing/social media/ may be willing to provide funds for advertising dependant on who it is

Pm me for more info/ Don't waste my time (asking for a link from get-go only giving to serious people due to the huge upside (google trends + more people are learning about it) /proof of funds may be asked for
