Just updated the bot to 1.1

- The free trial is extended to 20 fishes
- Improved security

Feel free to ask me any questions regarding the bot!

New update: Vanillabuddy 1.2

1. Performance/Bug fixes

1.1 When starting the bot, you don't have TAB into the game, the bot will do it for you.

1.2 The exit setting for stopping at a certain time did not work, now it works

2. Settings

We've added a settings menu.

2.1 Fishing Zone

Here you can change the size of the Fishing Zone, if you need it bigger

2.3 Throw Intervals

Now you can set a randomized interval between Throws. This helps to keep it undetected if you

plan to bot for a longer time.

2.3 Bob Sense

Since the bot detects changes of colors(brightness) to detect if the the BOB moves, being in bright places can make the bot missclick.

Now you can change the BOB Sense to make it less sensitive or more sensitive depending on the light of the area, if the bot missclick, play around with it.

2.4 Re-Throw Detection (All Resolutions)

If your not able to use 1920x1080 as resolution setting, you can now use any resolution. You then need to change the Re-Throw Detection placement. It needs to be at the left corner of the fishing progress bar.

Will be giving out coupons for a free bot usage. Send me a PM!
