I used to buy and sell websites on Flippa. It has great traffic. I used to flip turn key websites on there for a good profit. Would buy a site for \$100 or less, do some promotions get a few sales then list it on there for between \$300-\$600. Sold em like hot cakes

*food for thought

Flippa would be number one. If you're looking for free listings though, check out NamePros, DNForum and DigitalPoint.

I'm just looking for a business to buy. Can I see your business and find out the cost?
