Thread: [Should I include my YouTube tutorials on my resume for web developer](#)

blackcoder00 - September 10, 2019, 8:39 am

Hi guys i want to know if i can include my YouTube tutorials on my resume and all certificate i earn and what can i write in profile

education :

bachelor of computer science

certificate :

Udacity full stack

udacity Front End Development Track

microsoft html/css

free boot camp html css(300 hours)

PHP Tutorial course sololearn

Udacity Android Development Track

testdome certificate (html/css)

Profile :

Youtuber (tutorials about programing such html/css/js/jquery/algorithm/pascal/java)and owner of programming site(Soon)

experience :

i don't have

So it's my first time to build a cv and i don't know how to start

DNA - September 10, 2019, 9:18 am

First I would include only nationally recognised certifications, secondly I would only include that as a hobby.

the problem that i don't have experience ?

Fortunate - September 10, 2019, 10:58 am

Like Jelly said, I'd include that as a hobby. They will definitely take a look in it and it will mean a lot if you don't have previous experience. You gotta start somewhere.

As Fortunate said, you gotta start somewhere. Unfortunately your first job in the industry would be the hardest to obtain, unless you have a portfolio which will assist you a lot.

If you can prove that you can program, then you're as good as a programmer.

In this industry, I am thankful that certifications aren't a requirement.

indicud - September 10, 2019, 11:58 am

I would definitely put that on my resume. It shows the interviewer that you know your shit enough to

teach others, also this would set you apart from other interviewees.

You can create awesome CV's at Canva. Just google it.

Also GL

Krepto - September 11, 2019, 5:59 am

It shows a lot of confidence so if I was you, yes I would include it!

blackcoder00 - September 11, 2019, 11:09 am

Not really, unless you're running a site that it well known.

Think of your portfolio like that of a fashion model.

Would you hire a model with one photo in her portfolio?

Best bet is to have two or three aesthetically pleasing websites for your first interview.

Trial and error will get you a decent job in the development field. Don't get discouraged by a few bad interviews.

Moxxi - September 11, 2019, 3:43 pm

You could include it, but a portfolio of actual web work youve done would be a bigger help. Videos probably wont mean anything

blackcoder00 - September 11, 2019, 4:03 pm

As for your bachelor, I don't have much higher education than what America calls "community college", yet I'm running two businesses.

I said this so many times before and I'll say it again, certification means nothing.
To me, having a bachelor or a degree is a lot of wasted time and effort.
