Ok so as expected I tested this for two days. It's gambling so inevitably, there is the risk of losing. And apparently, this script is not at all the most adequate because in two days, I lost twice the entirety of what I had put to try. To avoid then.

Yep I lost \$30 twice using this script

Avoid 100% it doesn't work

You have a higher % chance of winning using the auto gamble and just increasing it by 1 after you bust, and down by 1 after you win.

The script is not bad but you will lose everything about twice per month unless you have more than 0.137257 BTC to run the script at 1 Bit ( $1 \times 10^{-6}$  BTC) which gives you a profit of about 500 bits/day (0.0005 BTC) if you run it 24/7.
