Thread: [Where and how to test and install backdoored exes](#)

inceptor - September 12, 2019, 10:43 am

I don't wanna get infected but I also want to run the exe file ..where and how do I use it ..in VMware ,? Can I also do all basic things in VMware like using a rat etc ..

SIM-4294714 - September 12, 2019, 10:52 am

And if you look on your left, you'll see a real life skid who doesn't know how to use a VM

having ub3r used to mean something on this site
im almost ashamed to wear it now, absolutely pathetic

Pennywise - September 12, 2019, 2:00 pm

Run it on a machine that will never be connected to the internet.
No internet, no data leak.

CyberStrike - September 13, 2019, 5:36 am

Virtual Machines is what you are looking for disable all sharing I do mean all and keep the VM on "Host Only"

Edit: Get yourself a free VM from Microsoft, Google this part.

inceptor - September 13, 2019, 6:57 am

Ok thanks guys I'll try that out .

TM111 - September 13, 2019, 7:31 pm

Use sandbox man it's pretty simple... go ahead and download some windows virtual machine.

I'm going to agree with you on this one.

inceptor - September 14, 2019, 9:44 am

Lol dont hate on me am coming here after like 5-6 years and i was primarily a money exchanger not a hacker or a tester or anything as such am like 8 yrs old on this forum but not very active in past few years ... i am trying to get back to the scene .

Lynx - September 14, 2019, 10:05 am

I'd suggest using vmware or any other vm for sure.

That's all that counts! Please ask if you need any help. I'll gladly help you out :)

Demoralise - *September 15, 2019, 12:13 am*

Sandboxed VM with wireless connectivity disabled

SneakyHF - *September 15, 2019, 12:15 am*

If you're windows 10 PRO and latest updates, maybe you can try their new integrated sandbox

Demoralise - *September 15, 2019, 2:26 am*

(Sep 15, 2019 12:15 AM)SneakyHF Wrote: [\[CITE\]](#) If you're windows 10 PRO and latest updates, maybe you can try their new integrated sandboxBAD idea. Do not follow these instructions. Easy to bypass and the exe will run directly on the hard drive or SSD without being in a virtualised environment
