Thread: [Best sports gambling sites?](#)

Spotlight - September 13, 2019, 10:36 pm

I used to use nitrogensports but not sure if that is the best one out still. Just wondering what the best site is currently? Also dont want any kind of ssn verification or none of that

Butter - September 15, 2019, 1:25 pm

Wagerr is for you my friend..

Decentralized peer 2 peer betting against the blockchain..

F all that centralization

cryp - September 15, 2019, 1:36 pm

For cryptocurrency I enjoy cloudbet personally.

Kill Joy - September 15, 2019, 1:47 pm

Sportsbet.io is one of my favorite that I've used since it was started.

Liema - September 17, 2019, 5:48 am

I've used sportsbet.io a lot. They have amazing giveaways , instant deposits and instant withdraws. Never had any issue with them, live betting is awesome there.

Ronaldini - September 17, 2019, 6:38 am

For sports ill say its betfair

but for esports (which i think is way better to make money from) itll be egb

Butter - September 17, 2019, 6:43 am

:facepalm:

You guys all know that these are all centralized..

Where as wagerr is DECENTRALIZED..

which is the purpose of this forum..

Buy wagerr and stop jerking around

cryp - September 17, 2019, 6:44 am

decentralization is not about the price..
My morals are up..
How can you shill something because its not 100x..

cryp - September 17, 2019, 6:48 am

I'm shilling you because you're swaying people into a dead coin that is -100x.

Butter - September 17, 2019, 6:50 am

(Sep 17, 2019 06:48 AM)cryptoyalty Wrote: [\[CITE\]](#) I'm shilling you because you're swaying people into a dead coin that is -100x.
But its the only decentralized sports betting cryptocurrency!

THE ONLY ONE

How is it dead?

Why are you swaying people away from 100x returns?

The only reason the price is soo low is because people have been winning wgr..
Which has made our economy slightly inflationary..
But in the long run.. Deflationary is gonna happen..

cryp - September 17, 2019, 6:54 am

All of them use centralized APIs to get sports results..

We don't..

Kill Joy - September 17, 2019, 7:19 am

No one cares about your bag of s h i t.

\$8 million marketcap is laughable. I wouldn't even bat an eye at this or the useless technology it provides.

Edit: To clarify why it is useless, and I would love for your rebuttal, WGR is politically and logically useless and not needed. Architecturally, maybe. But the latter is of less importance than the first two.

Butter - September 17, 2019, 7:42 am

What would happen if everyone that bet on sportsbet won.....

Ohh yeah, they wouldn't have the money to pay out..

Or maybe they would ban you..

/end thread

Peer to peer betting is bullshit unless you have a lot of people playing. Else you just don't get a market to play at.

Kill Joy - September 17, 2019, 8:56 am

So you're proving my point that WGR is not logically necessary. Thanks. :)

Butter - September 17, 2019, 9:29 am

(Sep 17, 2019 08:19 AM)tiffanynbv Wrote: [\[CITE\]](#) Peer to peer betting is bullsnap unless you have a lot of people playing. Else you just don't get a market to play at.Same with anything.. including btc

(Sep 17, 2019 08:56 AM)Kill Joy Wrote: [\[CITE\]](#) So you're proving my point that WGR is not logically necessary. Thanks. :)

No because you bet wgr and receive wgr..

If someone bet 1,000,000 btc that someone was going to win 22x.. how would they pay that?

/end thread

This makes absolutely zero sense.

Point 6.4 in the whitepaper states that they are a traditional competitor to any other sportsbook at a lower fee.

If you win.. WGR is minted.. If you lose.. WGR is destroyed..

We are a unique competitor to all sportsbooks

Try it out:

[Releases wagerr/wagerr-electron-app GitHub](#)

Unique != better or more valuable, which the market has already proven.

There is no advantageous value for users vs a traditional sportsbook.

This is such a lame and boring project.

Butter - September 17, 2019, 10:31 am

I disagree..

Unique by more decentralization is better..

We are not running a PnD scheme here..

Why neg rep... Childish

Decentralization is such a broad term. Can you tell me what specifically in WGR that is decentralized that is better and more advantageous than a traditional sportsbook?

wagerr is a fork of bitcoin core..

Same everything..

Except tokens can be burned/minted based on winnings..

The module is called 'value coupling':

The more people win and create wagerr..

The more wagerr in circulation..

Leads to increase supply

Price goes down..

People buy cheap wagerr..

More people lose..

Less wagerr..

decrease supply..

price goes up..

people sell wagerr..

The people buying wagerr cheap is effectively the house!

Heres a calculator:

<http://coinatomy.com/p/calc>

The odds are currently scraped from about 5 top APIs in the game..

But we are ramping that up to 2000 APIs soon..

We take the average price of the bookies and make the odds 100% non profitable..
Then 6% of profits get burned as shown in the economics page..
So in the long run the house always wins..
Users are always paid out..
Currently the gambolrs are up nearly 3m wagerr..
[Wagerr Block Explorer](#)
thats why the price has declined..
But one day it'll be different..

Nobody can be banned from wagerr
and nobody loses their knee caps..

If you got knowledge that nobody else knows then you can make \$wgr..
AKA tyson to beat wilder..
Get some free wagerr..

We've never done any promotion except for this post lol
