Thread: [ONLY working Telegram Bot in HF - Easiest AutoPilot method.](#)

erotic - September 15, 2019, 11:34 am

I'm gonna be honest with y'all.

I have no clue about how much money this can make.

What I do know is that this method is so easy that EVEN I can do it.

So here goes.

- Download the Telegram app and get set up (It requires a phone number and a name and that is IT)

- Click on this link:

[Telegram: Contact @robot_automatic_vs_bot](#)

THAT IS IT!

EASY AS!

So like I said this ain't no bullcrap method of scamming you - if it was would I put it in a thread for every legit user to judge and comment on?

MrZion - September 15, 2019, 11:55 am

Link not working for me bro, have you already made any money from it? How do you know it is 4 real?

The link should work now?

I have not made any money off it yet but I have some reputable friends who it works for.

So then it doesn't work?

Rsynced - September 17, 2019, 8:05 pm

What is this all about? Rather confused here? How is it auto pilot and why are you not using it?

Yes.

This concept ^ with a "free money making" option which encourages you to deposit to speed up the process. I have not checked the specific bot you posted but I am fairly sure it is one of them that don't pay out and require 10 referrals before you withdraw which is why I'm assuming you posted this.

There is no referral requirement but you have to get 1000 "gems"

Let me guess, you either get theses gems at like 10 a day or by referring people for like 200 a referral?

yeah you have to invest the referral money into bots which give you withdrawal money

Please your payment proof or this is scam

You are here to phish some referrals ,which is a requirement for withdrawal
and even after you get the required referrals, you can not withdraw.The bot will then say that it discovered more than one sign up from your IP and ask you to deposit a fee of \$5/410 to verify that your are real.Once you do that,then there ends the story.
But your 10 referrals repeat your loop ,earning the bot owner again and again

Just think how and why will the bot pays you when it is not 'earning' anything off you..? will not make any business sense unless it is a scam

Please don't waste time on telegraph bots sh!t

pein - September 28, 2019, 12:03 pm

the one that offered the highest reward, was a scam
was around 150 dollars just for signing up for a newsletter
and then you need to invest or get referrals and then if you got refs you get a message that duplicate ip received, so they won't pay

some bots will get caught straight up when you enter their link without a referral without the number
others got a few bad stories if you google on them

i received this robot automatic stuff, from more than 5 people as free method, and they provided proof of earning
they pay very low without investment, its exponential growth so maybe you can get something out of it without pay
i got this robot thingy, it's like 2 clicks a day so not that annoying, after one month im still at like 100

diamond on 2 days maybe 150 but that's reinvested. My actual earnings are 30 daily and 15 to payout. Eventually if you got enough bots, then you can get out like 1000 diamonds but i guess that would be like 2 months of work and 1000 is only 10 dollars.

Some other bot had written that has 10000 funds and already 15000 paid out which makes no logical sense.

Some of them shows proof of earning, but they never go from same wallet to users, they look like random BTC transactions timed each day with few hours i between to make it seem that the app is active.

Some of them are like 3 year old and the author only checks in 5 months so it won't get inactive.

I've been wondering how they are paying out all this money to nothing in return, It defs does seem like a big scam, Maybe not now but in the end.

Is Telegram Bots really a scam? Is there any one here that got payout using "Robot Automatic" channel. Pleaes enlighten me more if you got any experience with it. I am just thinking something fuckkkyy about these things is that you aint doing shit and they paying you for no reason!? It makes me wonder that these Telegram Bot is BS. But if anyone got any experience with it let me know.

LOL..your proof

<https://i.imgur.com/okYPGZk.png>

a random blockchain transaction doesn't say anything..

You should have chosen a whale btc txn and sent me to 'prove' that you have got just a paid a million bucks in btc

like this one
