Spoiler ([Click to View](#))

Revolut is launching a new international campaign with a starting balance of € 15 for the completion of the Revolut prepaid credit card. The physical card is also available free of charge and without additional shipping costs.

Advantages of Revolut:

Especially for travelers or those users who are, for example, a lot abroad and order in foreign currencies, the Revolut should bring some advantages.

There is no foreign currency charge, you can withdraw cash up to € 200 per month without fees, you can exchange currencies or set up currency accounts free of charge. In addition, you can apply for several credit cards in different designs:

How do I apply for the revolut and how do I receive my bonus?

- Go to <https://revolut.com/referral/david3c2!G10D21>
 - Enter your mobile number on the Revolut page
 - Download Revolut App
 - Perform registration process
 - Charge up your account balance with at least 10 €
 - Spent min. 0,15€
- ==> 15 € start credit + free Revolut card received

I've been using it myself since it launched and never had problems with it.
Someone already signed up and done the process.
