About me:

I am currently in my senior year working on a bachelor's of science degree in computer science. Over the summer I completed an internship working as a junior level developer on an IT team. I am looking to brush up and expand upon my development skills so I decided to open up this service. I also offer a tutoring service if you want to truly understand exactly what the code is doing.

Languages:

C/C++/C# .NET

Java

Python

PHP

PM if your language isn't here!

Previously completed assignments:

Stanley - December 21, 2022, 6:46 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

that's literally how impersonator scams work. you never deal without both parties accepted contracts. it's even somewhere in the rules that you must have contracts up. so if you still went ahead and sent the money, it's on you. just use the search function and type in "impersonator", you'll see that it's quiet common for scammers to use more reputable users, randomly reach out to other users on discord or TG, saying they are user "xyz" and initiate contract but the contract is only valid if both parties click on accept. scammers prey on that you will send the money first before the unsuspecting merchant can click on deny.

This exactly. I don't do any deals without contracts.

I'm looking to start this back up please reach out if you need any work done. Projects, websites, assignments, testing, or even just code fixes/setup. I have the time and wanting to get back into doing more work.
