Thread: [==> UPGRADER.CC <== PROJECT OWNERSHIP BEING SOLD = EST. 4K GBP MONTHLY REVENUE](#)

xBleach - September 17, 2019, 1:13 am

Hello,

I've decided to put <https://upgrader.cc/> up for sale.

What you get:

- Full ownership
- Discord server with 1000 members
- A method on how to gain legit members organically fast
- All our tools to achieve the invites
- Our entire stock
- Site + Domain

Our Brand Identity

Upgrader.CC is known and branded across multiple platforms and forums with an estimated monthly revenue of +4000 GBP.

It is currently one of the biggest automatic Spotify Upgrader, has a user-friendly front-end and an easy-to-use backend.

You will be provided with the sources and files to restock your own invites, however, we do not provide you with any servers.

Why we are selling the project:

We are selling the project as our working hours are limited due to personal reasons and are therefore seeking new owners.

No, we are not trying to sell this because Spotify is patching it up. - We've already patched the fixes up.

Future support and development

Our experienced developers will work on the project for their normal fee. However, it's open and simple-coded for any developers to develop further on the project.

Tell us the price in EUR you've got in mind in DMs. We'll negotiate on a price to get the contract started.
