Thread: [\[SELLING ONE COPY ONLY\] Unlimited Gift Card Method - \\$600+ in Gift Cards Included!!](#)

Deployed - September 18, 2019, 2:09 pm

Hello HackForums,

Note: Just found \$2,128 to North Face in 10 minutes; NO JOKE

Price: \$5000

I have recently discovered a method that allows you to "obtain" Gift Cards for just about any Business. After testing this method for the last 2 hours and earning over \$250 in Hooters Gift Cards, \$2,000 in North Face Gift Cards, and over \$1,000 in Gucci Gift Cards; I thought that I might sell this method to one lucky soul

See Vouch Below from: "Chief Bromden":

Quote:I'll tell you this, I dont know how he came with this method, as it is very very clever/technical. You dont simply 'think' of this one day, if he did then OP is some genius, he clearly has done lots of research and I think the price tag is deserving as you can definitely made 2000\$+ daily with this, as he is making 1000\$ today according to him.

Ill also be offering a surplus of free gift cards with your purchase (and will even send a few gift cards out to interested buyers initially to prove the method is legitimate). Also stay tuned for multiple sales threads of mine going up selling Gift Cards across the forum. I wouldn't mind selling to someone who would like to start a Gift Card Shop on this forum.

Let me note that you can easily make over \$5,000 in a day with this method in straight Value Gift Cards; so please, no low ball inquiries

View My Table at Top Golf after blowing \$700 in one night (This was for 2 people):

<https://i.imgur.com/99hC0Xw.jpg>

Tested Stores: North Face, Gucci, Louis, Ugg, AMC, Panda Express, Darden, Hooters, Nautica, but there are hundreds more you will have to discover on your own

NOTE: This requires no Programs and no Social Engineering

NOTE: You will not receive the Pin/CVC to the cards with this method.

However most of these businesses do not require a pin to use the gift cards... For instance I have spent \$800 at a Top Golf with this method with absolutely no problem as no pin is needed (unless you are looking for online purchase capability)

Thank you,

Good luck with the lucky one :) that seems like the holy grail of the GCs!

JohnBarr2 - September 18, 2019, 3:51 pm

How do you plan on getting vouchers if you're giving out one copy..?

Venture - September 18, 2019, 3:57 pm

Might be interested; Depends what happens, a high price, no credibility, etc. I don't know if I'd f with you

Update: I'd asked for more proof, and was just directed to one vouch, after seeing Brom's review I still have doubts regarding viability, you'll need to do more than buy the method; When I asked for further proof about the method working, I was immediately ghosted by Deployed. I'm not going to say "don't buy", but I'd definitely tell you to use a middle man, and be wary of what you get yourself into, he's acting dodgy. IMO, it's not worth the price tag asked.

Venture - September 18, 2019, 4:05 pm

(Sep 18, 2019 04:04 PM)Chief Bromden Wrote: [\[CITE\]](#) He had someone else post a review I believe, but I don't take their word as granted 100% as unfortunately they're relatively new to the HF and the marketplace in general from what I've seen. I'm interested to see if OP will cooperate and take others queries at hand, we'll see.

That's too sketchy for me, afaik the users could be working in coordination with one another. ?

(Sep 18, 2019 05:50 PM)Chief Bromden Wrote: [\[CITE\]](#) Alright, OP gave me a copy not so long ago, around an hour prior to this post and I'll be posting a review after not completing it, but he ran me through it and it worked, so he did it while I was speaking to him.

The profitability he claims in the thread is definitely true, I cannot deny this. In order to get these giftcards is extremely fugging easy, like, super copy-paste easy. Except the only part which I would probably not bother my time with is confirming balance on the cards, which needs to be done by calling an automated bot using a phone number, it's not a real person to clarify. He told me that he outsources them to other people for like 10\$ an hour and after spending 40\$ on outsourcing he makes 500+ in giftcards which is obviously worth-while. In terms of the hat this wear, I'd say it's probably GH-BH, he said there is potential to dive into BH and increase profits, I'm not going to lie to people and say it's white-hat completely, so take my word as it is. He said the risk is very minimal,

but I typically do not take risk of any form. If I were to do this method, 100% get some person to outsource for you, I believe upwork is a quick way to find some VAs to do this job quickly and daily. Overall, it's very easy for you, very boring calling hours for your VA and lots of giftcards in a GH or so manner, from my understanding. I hope I answered everyone's questions, I hope OP does not regret providing me with a copy. I'm trying to be as honest and blunt where I can be.

Absolutely no regret and what I would admit to the entire forum itself. The method by all means can be one of the most profitable sources of income in your day to day life right now. Try it yourself to make a few hundred in the beginning, and then advance to outsourcing so others can make 1000x+ what you invest in their hourly fee. As for WH-BH ranking, you simply have the capability to use gift cards of your choice from a store. If you generate your own unowned gift cards what would you rank that? If you discover a pre-owned card, obviously we would rank that higher.. It all comes down to how you use the power you will find behind this method

You can purchase these gift cards on other forums like this one which I can't name and you can get it for 10-15% of the balance without CVV or PIN. Save your money and just buy cards you need.

He's right you don't get the pin or CVV but most of these vendors sell them for 10-20%. I'm assuming OP has you purchase these cards and re-sell them for 50% to people via marketplaces.

Absolutely incorrect, but thank you for your accusation. Why don't you share the links to the forums in which you can purchase gift cards for 10% off as opposed to stating a method that doesn't exist?

There is absolutely no cost to obtain these cards

Hey guys! Got a VC of this method and can say it's actually legit. The guide is well written. Funny but also professional and to the point when needed. There are tons free gift card codes scattered in the guide itself, so you can actually order and eat food while reading the guide xD Thought that was a pretty amazing way to start the guide off. It has 3 steps total going from obtaining the giftcards, to how to quicken the process of obtaining them. The actual guide itself is 5 pages but includes completely everything you need.

The guide itself is very technical, has every single nitpicky detail you need to get the codes. I received the guide an hour ago and have already ground \$125 in Hooters gift cards (and now \$300 from a local store in my town!) since that's the main example used to demonstrate in the guide! Basically free food forever now. I can see this working well if you're maybe trying to start a gift card shop on HF or want to have free food/clothes. Everything is legit. I couldn't vouch for this more. Going to get more codes after typing this!

I'm very glad that I got to VC this method. If anyone has any doubts just message me. Thanks again!

Could you show any of your earnings from selling these gift cards you've obtained? Or even things you've bought with the giftcards.

I'm somewhat interested, but obviously there has to be some illegal things going on here. From 1-10, 1 being zero worries, and 10 being the police arresting you, how 'dangerous' would you say this method is? I know that Amazon for example has begun silently building cases against refunders and many exploitable companies are following.

Also earning wise, so far I've just been spending; not selling my cards. But I have opened a few sales threads hear on the forum. Feel free to purchase any gift cards at your disclosure for further proof, check out the vouch from Chief or Binjy, or if you are entirely interested in buying and provide a reasonable bid I could just throw you a \$400 gift card since it is dirt to me with this method

I rate the danger between 1-2, honestly.. that is no exaggeration.. very valid question however

How long are these cards viable for use? If you can't use them online without the PINs (in some cases), are you receiving physical cards? What are the odds of the orders being cancelled as the cards are invalid/stolen? Any possibility of a cheaper type of test copy? I've been around the forum for quite some time and would be willing to write a lengthy and detailed review of the method itself.
