AIO Traffic Bot for 21+ Websites

Tired of going around forum to forum, chatroom to chatroom, traffic site to traffic site promoting your snapchat / KIK or Instagram etc....? Well, now we have created an All-In-One bot that will simultaneously promote your chosen platform across more than 20 websites simultaneously, 24/7. Using your custom text, the bot will run 24/7 and get your platform traffic from thousands of unique individuals.

This will be slotted in order to make sure that each customer gets the utmost best performance from the bot and to ensure the websites are not overly saturated so that each individual buyer will get an ongoing and continuous stream of traffic to their chosen platform. We strive to ensure you get the best return on your investment, and by not selling the program and limiting the amount of slots available for use, each buyer will be receiving HQ traffic.

your ip may get banned in which case all u need to do is to use proxy (bot has a built-in proxy support). Any free proxy or cheap paid proxies would work ...

Anybody else out there use this program recently? The author is apparently on vacation, and lives somewhere in Syberia ?

Had it for a couple a days, and it apparently works as advertised...for a while. Runs about 20 minutes then grinds to a halt.

First time I ran it, it ran for a couple of hours, and I didn't get any adds on my snapchat page(using it for e-whoring).....

Started it up again, let it run overnight. Woke up to about 300 views and 100 adds. Using proxware rotating proxies.

Scheduling program petered out ?

Program looks like it has potential, but it has no documentation and it's been flakey the past two days.

Bit bummed as it's \$120 a week.....other bots out there that similar. Thanks guys.

Quality of traffic, can't really comment. It's chat traffic. Got one sale at \$40....

I recently purchased the AIO Gold and here is my honest review.

Firstly I am not satisfied to say the least. There is a lot that is unadvertised that should be spoken about on the thread.

1) The thread does not advertise that this bot is selenium. If you don't know what selenium means, it pretty much just opens a web browser and enters all the stuff for you. So it is done at the same speed as a human if not slower.

2) The anticaptcha they sell is very very very slow. 10x slower than a human could solve it.

3) It plays all the sounds from each chat window you start. So if an ad pops up, you are listening to this. The way around this is to start the bot then mute each window which is annoying.

4) You can only enter one proxy. This being said, it pretty much is 1 thread/bot

I ran this for 1 hour using all the bots they have and only received 15 snapchat adds. I believe this bot is extremely over priced and it needs a lot of work done to it to make things faster. The biggest issue is not advertising it as selenium. If that was noted on the thread I wouldnt of spent a dime.

thanks for this review. opened my eyes. you exposed this scammer.

BlackXPearL - December 25, 2019, 12:12 pm

Here are my responses to your comments.

1) The thread does not advertise that this bot is selenium. If you don't know what selenium means, it pretty much just opens a web browser and enters all the stuff for you. So it is done at the same speed as a human if not slower.

The bot is coded in Selenium for a reason. Those that are based on http request are faster, but they get banned in no time as the don't set any cookies, cant bypass captcha and cannot overcome many anti-bot measures that are set in these website. The selenium bot allows to overcome these antibot measures and run the bot for long times.

2) The anticaptcha they sell is very very very slow. 10x slower than a human could solve it. This comment shows how much you know about bots! All bots that have to bypass recaptcha are slow and this is not specific to this bot (and yes, they are all slower than humans, and that's in fact the reason why captcha was developed at first place; to slow down bots!). The service I am selling is unlimited access to a capmonster server for a negligible price. You don't have to buy captcha service from me, you can bring your own third party captcha service as bot accepts almost all well-known captcha services like 2captcha, rucaptcha, anticpatcha etc.

3) It plays all the sounds from each chat window you start. So if an ad pops up, you are listening to this. The way around this is to start the bot then mute each window which is annoying.

Thanks for bringing this to my attention. I updated the bot to mute all windows with a single line of code. No one else before had complained about this.

4) You can only enter one proxy. This being said, it pretty much is 1 thread/bot

The bot supports both static and rotating proxies. You can load unlimited number of proxies from a text file to the bot. You could have simply asked ... Bot runs 23 sites concurrently, so there are 23 threads. There's a reason that only one thread per site is allowed. Imagine if 10 clients run 100 threads per site concurrently, that means 1000 bots flood each site with spam. No website would allow that many bots running, and will ban the bot in no time. Limiting number of threads is merely to ensure that bot is functional for long time and profitable for every client.

Also, this bot, like any other bot, is merely an automation tool and does what it is supposed to do, which is posting lines u load into it into the listed website. The number of ads u get more than anything depends on what you get the bot to post and that's where u need to be creative. Don't expect to get lots of ads if you simply get the bot to post "hey, I am hot, click on my ad"

As I mentioned to you in DM, maintaining 23 bots at the same time is challenging and some modules may not function at times. I will be releasing a new version in January and you, as well as other people who purchased the bot in December, will get extended license for this updated version.

don't call someone a scammer when u have no idea what's going on!

JehovahLovesYou - December 29, 2019, 12:42 pm

I'm glad the sound thing has been fixed, I was going to mention that.

A strong RDP is needed for this bot.

The messages posted by the bot were incomplete fragments of my original text message. Only parts of it got broadcasted in different sites. Not a matter of being more creative, the bot wasn't posting all the material in the text file.

I'm shopping around for other bots, as it will be weeks until the original copy I purchased is fixed and up and running. I plan to do a side by side comparison about how a selenium bot stacks up against other methods.

The AIO bot SHOULD reliably produce 1k+ views a day.

this guy is a scammer, I've bought AIO traffic bot for 200€, the bot didn't work at all, I literally asked 10+ times for refund or fix this shit, he never answered.

To see the truth, you have just to come in his shitty discord server and see how his clients are satisfied.

Trash seller.
