vidpromoter - September 20, 2019, 12:04 am

Hi,

As we all know Reddit is a Goldmine for high quality traffic but you can't just spam Reddit as those posts will be ghosted within minutes and accounts also got deleted.

That's why I started this new service where I am going to create posts for your projects and start posting them on high traffic niche related subreddits everyday which will bring only high quality traffic to your website daily.

I will use only aged accounts with high karma which has reputation as well as i am going to upvote your posts a little as well just to start boosting. I will post daily according to your subscribed plan and update a Google sheet report which you can access to see everyday progress.

HOW ITS WORK:

- You provide me your niche.
- I will provide you list of subreddits with high traffic related to your niche.
- You provide the exact list where i should post (please see plans for this).
- After that i will start creating posts everyday on your preferred subreddits.
- You receive traffic daily.
- I will update the Google sheet at the end of everyday so that you can check everyday progress.
