What is the average profit when selling sneakers?

Does this bot only buy sneakers within the US? Or does this apply to Europe, more specifically Scandinavia? I.E does it work with Scandinavian shops?

Depends on the drop it varies on stock really. i.e. limited yeezy drop yesterday profit margin was \$500-\$2000 per pair depending on the size. The drop tomorrow and monday you are looking at around a \$100 profit margin per shoe.

I am not selling a bot I am selling mentorship - most bots on the market do support EU CA USA etc.

A supreme only set up you can probably get away with \$500.

You get into shoes you will need at least \$400 for the bot then spending money I'd say at least \$1,000 so you can get started flipping 2-3 pairs at a time.

Recommended US only. You can make money from Canada but your profits are pretty ate up from import fees if their isn't a .CA site option.

Stanley - January 30, 2020, 6:12 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
