Thread: [50% Discount on Pre-Orders! || \\$10 || The Blackhat Book of Dirty Tricks: Ruin a Life.](#)

**M L T** - September 21, 2019, 8:46 pm

So, in under 72 hours time my first e-book is going to be getting released. It will be \$20 per copy. It's going to be between 90-120 pages of tons of different methods that can be used to destroy a targets' life after you have obtained their dox. Many of these methods are private and unique, and are extremely effective at ruining one's life!

I'm posting this in advance, because for anyone who pre-orders a copy, they get a 50% discount! Of course a contract can be made, so you know that this isn't a scam of any sort... As if I'm going to scam someone for \$10 and risk having my account banned.. lol.

This is just a special offer for anyone who wishes to pre-order the book now. It will be released by 25th September. Anyone who pre-orders a copy before that date will get the book for \$10. Anyone who buys a copy after the release date will have to pay the full price of \$20

Here is a sneak-preview of the books' contents:

If you want your 50% Discount, simply open a contract to pre-order the e-book and send your funds (\$10) to the following BTC address (PM me once funds are sent, or mark contract as complete) -- you'll then be given your copy for \$10 on the release date (Sep 25th) instead of having to pay the full price of \$20 once it is released!

Address to send funds to: 1GUVLm3rMHKRgMdUqJu4gP9Gpv6YEFULkU

Send your funds before Sep 25th to get your copy for a mere \$10, half price of the price I'll be selling it at once I release it in 3 days time... simply mark a contract as complete or PM me that you've sent your funds (link your txid to confirm) and I'll give you your copy at half price!

If you're based in the UK, I can also accept direct bank transfer!  
The details are as follows:

Name: Mr M L T

Hey, I wouldn't usually give out a vouch copy... but since you sent over \$5 I'll make an exception for you!

and, as for my VPN IP leak, it is based on a bypass for WebRTC blocking -- whether WebRTC is being blocked natively via about:config or whether its being blocked as a feature of the VPN client you are using, my method will cause the victims' browser to initiate a WebRTC connection regardless of whether it has been blocked or not, resulting in IP leak taking place... I can't explain specific info without giving it away, but yes, it is based around WebRTC. I'm using a method to circumvent WebRTC being disabled, in order to allow me to leak IP addresses even while it is blocked/disabled.

Thanks man, I added ur XMPP also.

Thanks for the Ebook, I'll write a good review on it and suggest any additions (I can do this on XMPP).

And does your Tor exploit still work? ty! or was it patched in 2014? ty.

I don't have any current working exploits for TOR Browser, nope. I do have a local file read bug for firefox (but tor browser isn't affected, sadly... despite it being based on firefox)

I don't really use XMPP any more these days. Try connecting to my IRC or add my discord

oh yeah, I know discord is terrible in terms of privacy -- I'm using matrix chat protocol as a wrapper w/ bridge to discord in order to chat via discord. I'm fully aware they're logging my messages, still.. but at least nobody can 0day my discord client since im not using a discord client

anyway, I'll hop on IRC after I've woke back up.

Definitely going to get a copy of this ebook

**yourown90** - September 22, 2019, 2:13 am

Going to take it soon. Hit me up on discord as soon as you are awake. I'd appreciate a proper lesson today!

I've got to run some errands but I'll be online in a few hours and I will be available for the rest of the day (and most of the night too)

BTW, to the people PMing asking me for free vouch copies -- the answer is NO. I'm already offering a 50% discount to anyone who pre-orders this book.. I already gave out a vouch copy to someone who was kind enough to send me \$5 prior to asking rather than just expecting it for free. So no, do not ask me for free vouch copies. If you PM me asking for this, you will just be ignored.

I am offering 50% discount (so it's only \$10 per copy!!) until the release date on the 25th, then it will be the full price of \$20 per copy. Sorry, but I'm not going to be giving out free vouch copies when I'm selling a 100+ page book for so cheap in the first place. Please stop PMing me asking for them.

Well, if you purchase it as a pre-order before the 25th then you'll get it for \$10 :) half price as stated in title. Otherwise it will be \$20 once I release it on the 25th.

**M L T** - *September 23, 2019, 5:51 am*

2 more days to get this half price! Once its released on the 25th I'm expecting \$20 per copy.

**M L T** - *September 24, 2019, 6:45 am*

So, this book will be getting released in under 12 hours from now. If you want it half price, then you will need to purchase it before then!

As soon as I release this, it is going to be \$20 per copy.

Bump, awaiting the ebook via PM! ty!
