Thread: [\[80\\$\] Forex strategy](#)

SilentSS - September 23, 2019, 11:31 am

Hello everybody :)

I got a strategy and it's price is 300\$... I got it for free from a person I know from internet for a long time (5-6 years), there are about 20 video tutorials explaining everything. I want to sell few copies because I need capital to start trading. My price is 80\$

Little bit more about the strategy:

It is most for scalpers and day traders, but can be used for swing trading too.

It can make 10-50+ pips in a normal to high volatile day, depending on many things.

Also can be used to trade metals and indices...

The strategy is builded to have a tight SL, the risk:reward is at least 1:2 to 1:5

What more... yeah, I tested it for 5 months... always works (doesn't mean I never lose, means on a weekly basis we are always in profit)

The point is, I have no real money to start, if I had, I would never try to resell the strategy.

One more thing for the skeptics: I have a lot of experience (4+ years) in the markets and I've lost a lot of accounts in the past...

Now when I'm already in, after reading dozens of books and suffered many losses I miss only the capital.

P.s. open for questions, ask if you need more info - here or with pm.

Hello,

Could you please show some proof, trading history?

You already had 5 months testing time, but still not enough capital?

Giving away any vouches???

ThumbsUp - September 25, 2019, 7:58 pm

Can anyone vouch on this I'm interested but not sure about these sections and methods on here yet.
