Thread: [in my bad experience with cyberseal bad](#)

Mrspy17 - September 24, 2019, 3:08 pm

yes dont buy its bad and scam tools ever 1-2days detected and bad just windows denfender detected haha

alway say watch tutorial and trust me all setting bad !

Try another better than this i think !

NYANxCAT - September 24, 2019, 6:56 pm

It's a public crypter so you need to re-crypt your file almost every day. Or buy a private crypter for a better long FUD.

Mrspy17 - September 24, 2019, 9:36 pm

supporters are shi:t alway say watch tutorial
2hour got detected by windows defenders

NYANxCAT - September 24, 2019, 10:00 pm

lol, read my previous post bro. If you need long FUD then buy a private crypter\stub

Mrspy17 - September 26, 2019, 10:31 pm

some guy work at cyberseal try Negatives on me haha claim down if your tools scam you can check
comment on youtube many people try say its scam how it fake ?

Cyber Coder - September 26, 2019, 10:52 pm

pretty funny when you opened this thread weeks ago

<https://hackforums.net/showthread.php?tid=6004108>

why you don't say that you are so stupid you couldnt open a video to read a text in it and when i
refused to spoon fed you you came opening this thread.

Maybe more things will make sense when you`ll stop using google translate

fuck me if the day comes when i start giving support for how to use youtube and pause videos

as for defender, try ANY crypter with shared stub from here and see what happens idiot

until then, you can kiss my ass ?

wraith - September 26, 2019, 10:53 pm

you need to start investing into private crypter if you dont want to get detected by as far as i seen
cyber seal is pretty good

Razar - September 27, 2019, 11:04 am

cyberseal is fuck crypter, owner the owner is very negative and does not help every time he refers to
the tutorial in addition, the crypter is not compatible with 90% rats, the file was never FUD, and if it's
just scantime, runtime sucks, I fuck this owner and his crypter I despise him

Ranker - September 27, 2019, 11:38 am

I had the similar experience with the owner. He is very rude & negative. I'd suggest everyone to stay
far far away from this.

Mrspy17 - September 27, 2019, 3:20 pm

yes sure but some fake give Positives dont trust Positives 100% on HF

and another thank my brother give me Positives

I try post threads last week because i pity want you help me but nothing finally i knew i try work hard long time no result with this cyberseal its bad !

everyone customer or experience bad with cyberseal when you say true cyberseal will Negatives to you haha

good service !
