Thread: [Gaming Monitor - need help](#)

Time - September 25, 2019, 4:21 pm

Hello,

Thank-you for your time. As the title says, I need some help in deciding which monitor would best be suited for my situation.

I am using my Xbox One X (SSD) to game PubG. (I will be using XIM Apex - mouse and keyboard). In these circumstances, which monitor would be best?

My budget is around \$5-700 CAD.

Am I better off getting a 4k monitor or a 1440p monitor?

Thanks

luv. - September 25, 2019, 4:29 pm

Go with a 1440p 144hz monitor. The 4k will mess with your fps

Thanks. Do you recommend BenQ and should I stay away from curved monitors?

Never heard of BenQ and never tried a curved monitor, don't really know anyone with one either.

I'd rec an Acer Predator or MSI

You won't benefit much from a monitor over 60hz, why don't you just save your money and build a pc?

I have an awesome rig, however my friends IRL only play on the console.

Ah gotcha.

I got an asus vg278q it's pretty nice, g-sync compatible too, I'd recommend it

Time - September 26, 2019, 5:19 pm

I've narrowed it down to these two monitors: Can anyone provide insight?

Thanks
