Thread: [My First Painting with a Graphics Tablet](#)

Crimin4L - September 27, 2019, 1:33 pm

So this is my first attempt at something with this new graphics tablet I bought. It's the XP-Pen Deco 01 and I feel like the video I watch definitely hyped this thing up, but don't get me wrong. This thing is still an awesome tool to have in the arsenal but I don't know how practical it will be :P

Here is what I was able to do with a paint brush in 5 minutes ? (Looks like a 5 y/o's painting LOL)

I would be pretty impressed if a 5 year old had made this to be honest

Haha, I just feel like I can do a lot better. I am also on an angle from the actual pad so that could be also why.

I think I need to have the pad right in front of me while I am looking at my screen for a better result.

Ye I see, I have slept only a few hours maybe that's why. Btw I'm using Deco 03 it's good tablet btw.
The shitty thing is I thought it will have a display :D
This is my second draw with it. [Preview](#)

I recommend you first to get some brushes and to start testing how it works.

this is pretty bad. sorry, a 10 year old would do better with their eyes closed :(

OutOnBailFreshOuttaJail - October 6, 2019, 5:08 am

Kinda reminds me of old south part episodes lol.

Unemoris - October 16, 2019, 10:25 pm

I think you don't have the pressure of the pen enabled.

I mean, meh. It's okay for a quick sketch, not much for 5 minutes of time though.

I haven't ever gotten to use an illustrator tablet before. I want one, was actually just skimming amazon for one:

Also, is your tablet compatible with photoshop?

Lol kinda funny, good attmpt lol.

Should use those for 3D design and texture colouring rather than drawing full blown images

Honestly looks way better than my first try. I'm still trying to figure out how to get it working properly.

Why what's wrong, what are you trying to get working?

I ran into a few problems myself, maybe I can help you.

norred - November 17, 2019, 8:14 pm

Wish I could draw like this at 5 years old Lol. Keep practicing and one day you'll have the drawing skills of a 10 year old.?

Seriously though this looks better than anything I would draw.

Sicko. Hard getting started out but keep it up it's wort it. if you know how to use it you it is one of the

best tools you can have in Graphics design. Sketching your designs and Artworks first takes away a lot of work upfront. Keep it up
