Huge vouch for Wicked. Had UI designed in less than 12 hours, developed in 4 days. Great service, and I look forward to working on future projects with him.

I needed something done in a short amount of time and was pretty nervous because this thread was not very active the past month. I want to vouch for this guy because he responded to me in a timely manner, and his graphics are professional and extremely sleek and clean. Would use his service again, 10/10.

Kash Studios - April 26, 2020, 6:07 am

Not here to order anything however just from another designers perspective, your designs are really amazing. They match up with the 2020 design trends really nicely and anyone looking to order won't be dissapointed.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Paid \$30 for a banner and logo, went smooth and looked fine.

Then paid another \$100 for a landing page design (I only needed the html/css which I told him, and he told me I had to pay \$50 for a design and then another \$50 for it to be coded, which I agreed to).

When the design was complete, I paid for the webpage and he started giving me updates as he made it, and I was telling him what needed to be changed and he was telling me to ignore the design features as we will fix them later, after he gets the layout correct, and to focus on that. So that is what I done.

Now that he has done all of the sections of my landing page except the pricing one, I have told him a minor improvement to make on it, and he is asking for more money because I didn't tell him

before. For \$100 I would expect that it includes improvements that I ask for.

Overall the design is fine but this is certainly not the experience that I would expect.

The edit needed is very small, just resizing 2 of the boxes so that they can fit a paragraph in. The font also does not load correctly onto the site which makes the logo not look how it should for some reason. I have told him and he said he will send me all of the files and discontinue the project, which I am still waiting for.

EDIT:

Now after telling him specifically over and over the end-product needs to be html/css which he agreed to, and even stated "if any javascript is needed it will be a problem" he has delivered to me a fucking reactjs app. This guy is a retard and will do anything to sponge more money out of you and make excuses for not delivering what you have paid for.

I already sent the html/css you asked for. Everything you paid for is 100% completed.

You delivered a reactjs app when i paid for purely html/css, without even warning me. Even on the link he just said the top section is broken.

He is even trying to blackmail me into removing my experience with him on his thread, saying that he won't fix the broken, wrong product he delivered unless I do.
