Xavier - September 28, 2019, 3:24 pm

Sales closed. Personal life problems that need to be addressed.

I appreciate each and every one of the clients I've developed a friendship with over these past couple months, but I need to stop being manipulative and learn to make an honest dollar.

I wish you all the best of luck, money won't solve your problems. Living an honest and principled lifestyle will.

Yes, the tool will pull money directly from your infections. It's NOT a silent miner btw.

Yes, it is pretty simple. There is one method in the package that you may need a little bit of help executing, but it is nothing that you can't learn in 30m - 1 hr, especially if I'm providing help.

I specifically set this up so that it can be done very easily by somebody who isn't necessarily an expert :)

Multiple vouch copies given out to high-rep UB3Rs! Expect some positive testimony soon.

The stealer only compliments the methods.

You really don't need anything, I provide everything you'll need in the download. If you use Gold/Elite packages then I crypt your malware for you.

The only thing you could use to help you is a .doc exploit, and it is not required, would only be helpful.

(Sep 30, 2019 09:09 PM)GenkaiWolf Wrote: [\[CITE\]](#) and if you dont mind me asking. what's the per day/week earning potential?

You could potentially make thousands in a single day or only 400 - 500 in a week. It depends on what the results are. You are spreading malware, it's logical that some days you'll get HQ slaves and some days you'll get lower quality slaves.

You could just as easily make 1 BTC in a single day with the kinds of people my method targets.

Good question. If you use the software I provide you then you cannot be infected with malware as there really is nothing you'll need to download, and if you do need anything it will come from trusted sources :)

Nothing will be tracked to you. My methods offer very high quality security, and due to the nature of BTC it is near impossible to track somebody doing this. They won't have a chance.

Im still in the process of setting everything up on my end but Xaviest's support has been wonderful. Dude answers all my super noob questions. The methods themselves can indeed work for you if you follow them to the letter. There's a ton of potential to earn here! I plan on updating when I earn like the poster above

So you basically send a BTC stealer to the victims(probably NyanCat's free one) which replaces the btc address with yours when victim tries to pay someone. That works in rare cases and you need a good private crypter...

Nothing new here...curious about auto spreading though...

Lol bro, if you think 900 slaves is an unbelievable amount then I also assume that you haven't been in blackhat for very long. 900 slaves may sound like a lot to someone like you who probably tries to spread a shitty RAT on YouTube, but to anybody with a little bit of experience it really is not that impressive.

You can get 15k tier 3 slaves in 24 hrs by renting RIG EK and pointing paid traffic to it. They wouldn't be super HQ but it would still be 15k slaves. That is a very basic method in blackhat, EK -> Traffic source. I wouldn't expect you or any of my buyers to know that, but I highly suggest you actually have some kind of expertise in the field that you imply you know a lot about before you get online and criticize somebody, skid.

My method only gets 900 a day because they are crypto-targeted as it's also about cashing out.

Blacksharkx - October 9, 2019, 1:36 am

Elite Package Review

Purchased the Elite package roughly 24 hours ago. I must say, this has absolutely blown me away! I have no experience in this field and was worried that I wouldn't be able to do it, but after a small setup and within a single day I've gotten 400 slaves and made a little under \$300 while I was sleeping. \$270 isn't much but for the little amount of work I put in it is incredible! I cannot wait to see where this takes me <3

Methods are very unique and creative. I don't think that this will be saturated for a very long time. I don't really trust products from HF so I was hesitant to buy but I am very happy that I have. I am about to get back to work and will let you guys know what happens moving forward. Highly recommended, thanks so much OP!

If you make 750 a day, realistically speaking, you make approximately \$273,750 in one year. Why would you sell this method when you can make that much money in one year? Seems sketchy.

Xavier - October 11, 2019, 11:45 am

As I've explained, I'm trying to build my seller rep. I have moved onto white/greyhat (I own three real-life companies, including a stock/crypto/forex trading consultant group, as well as cryptocurrency software company es evidenced by some of my previous threads) and I figured what is a better way to build trust than being probably the only person to sell a HQ eBook here.

Either way, I still get residual income from when I did these methods daily. They are autopilot to a point where once the train starts moving it can't really be stopped, so every now and then I'll find an extra few hundred dollars in my BTC wallet.

Good question.

Absolutely. While these methods don't require investment, a little bit of gas in the engine can expedite the process for sure. Whether that's necessary is the question I would raise. These really are HQ enough that you don't need to push them further.

If you have a lot of funds, I can share with you other methods not included in the product since they require a lot of investment. They are very HQ and very high profile so you will need very good opsec, but the results will keep you from having to work for a long time.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Well I apologize if the reviews that customers have written did not use your preferred language.

All sarcasm aside, you are free to contact my contracted buyers yourself. I don't ask my clients to write reviews, they can do that on their own free will.

I'm interested in purchasing the elite package, I saw that you agreed with a user above to do escrow until he got the bots.

I'm interested in the same arrangement. With the elite package (discord support, etc) how long until a noob is able to see first money coming in?

I'm sorry, I am only willing to do that with reputed UB3R+ members now as I've had two customers flake on me even after they made hundreds of dollars.

Besides, when I was open to that the product was a lot newer and was less vouched. It should be clear as day that my methods are functional and profitable by this point.

Regarding your question, it is possible to profit in the first day, but for a newbie I would say 48 - 72 hrs until you make an ROI on average. Once it starts, it will only pick up speed.

BrandonBoyd - October 16, 2019, 8:16 am

Not clear as day because out of all these vouches. There's only one payment proof and that can easily be faked.

The rest of the vouches are people just reading the method and assuming it works, there hasn't been a reputable member who's posted their progress so by this point nothing is really established yet and 3 days to make back \$50? I saw a guy that was supposedly a noob and made 270 according to his payment proof.

As I just stated, you are more than free to contact the buyers yourself. Wouldn't that be the most objective information you'd get? Why would you come to the vendor and ask about the vouches? I don't write them, and the answer you'll get will clearly be subjective seeing as I'm the vendor...

Did you really expect me to find somebody with a single post to be trustworthy enough to lend private methods that become worthless if you were to leak them? If you had any sort of contribution to this forum then I'd absolutely but open to that, but what do you expect with your profile dude?

The rest of the vouches are people just reading the method and assuming it works, there hasn't been a reputable member who's posted their progress so by this point nothing is really established yet and 3 days to make back \$50?

I don't think there is any program or product in which the instructions are: "Simply open up the program and instantly collect massive amounts of money". There is a set up process, what do you expect dude? You can clear \$1K a week once the ball is rolling, but you have to set things up, as with any process of building an income stream. 3 Days to make a full ROI on an investment is very, very good.

If you sincerely expect to open up the product and collect thousands of dollars in less than 24 hours, then this clearly isn't for you. You won't find that anywhere.

Excuse me? When did you ask me for a refund? I highly suggest you read everything I'm writing below.

You are the only client I have (Out of 30+ people) that has complained. Throughout this thread, there are multiple people who have praised the level of support I offer.

Most of my clients are doing phenomenal, and a couple even made a 400% ROI in less than 24

hours. Are you the guy that asked me to show you how to host a file on mega.nz via teamviewer and explain the entire process? Because I don't have time for THAT, but I do have time to mentor and assist buyers in setup along the way. I provide no less than four hours of support a DAY for this. To say that there is no support is an absolute and flat out lie.

A) To somebody who needs a 1-on-1 demonstration and explanation on how to upload a file to mega.nz, I'm sure there are roadblocks, just the same as a person with cerebral-palsy will have roadblocks if they try to become an Olympic swimmer. Anybody who has any kind of inclination towards tech (No programming or advanced skills are necessary) will not require a significant amount of support.

Since these methods are completely autopilot after setup, the only thing you could possibly require support with is the setup. How can there be a million roadblocks if setup is a couple-hour long process, one day at most? Even then, more than half of my clients don't need assistance with that as everything is clearly laid out in detailed tutorials.

B) It seems you ignored the tutorials and simply asked me "What next?". This stuff is not hard if you just read the tutorial I made. If you rely on me to direct every single move you make, then of course I'm not going to have time to do the entire process for you. If you use the detailed tutorial that I made, then you should be able to do everything on your own and only need me to answer a couple questions. I have over 200 virtual clients for various products and I own three businesses, I made the tutorials so that you wouldn't need to rely on me to do absolutely everything for you, yet it seems you didn't even read them?

C) And yes, there are refunds if the product doesn't work for you. My policy is very clear:

1) If you try the methods for a week and don't make an ROI then instant refund. (Most of my buyers make an ROI within 48 hours, some in less than 12 hours).

OR

2) If you find the methods publicly available anywhere else on the internet, instant refund. (Nobody has claimed this)

The user who I provided a refund to was having issues because his PC flat out broke and he sent me pictures. I've never had somebody give this their all for an entire week and not make an ROI. Your post is slanderous and incredibly misleading. I highly suggest that you go out, buy somebody else's spreading/monetization methods, and then try getting support from them. Only then will you realize how good of a product this is. I go very far out of my way as a vendor, so when somebody comes onto my thread with lies and slander, I'm going to take it very seriously as you are the ONLY person to say such things as this.

If I am faking vouches from so many UB3Rs, V3ndors and L33ts, I must be the mafia man of HF. I think if I was selling garbage I would have at least ONE deal dispute, but I do not have a single one. I've had a buyer who was unable to do the method due to his PC breaking and I refunded him immediately. Very good PC is not required, the software does not use many resources at all, and you don't need to have it on constantly.

I'm not sure if everything will work with a Mac (It should, but not positive). As long as you have a Windows machine available you're fine, regardless of specs.

Thanks for asking ?

A slave is an infected machine. This guide is my private methods to spreading malware and monetizing the infected machines. It includes everything you'll need, even as a complete beginner, from the software to the support.

It varies, but probably around 200 - 450 a week once you got it started.

Elite is much higher.

What about Gold package? I might buy this one instead in the coming days...

I've got approximately 1-2 hours per day.. What do you think, how long would the setup take for a complete noob? And is it running on autopilot after that?

Edit: Or maybe I'm buying the elite one if your telling me the income potential would be much higher... any real estimate?

Considering this is a blackhat method, what are the risks that come with this?

Gold will work as well. Again, the Elite package is the most autopilot out of the three, but gold will be fine as well.

1-2 hours per day is enough for any of the packages, but with Elite you won't have to do as much work every day. It will also make you more money. With the Elite package, you really can potentially pull more than 1-2K a week once everything is set up.

I appreciate your offer, but no. It says at the top of the thread that all vouch copies have been given out, there are already 10+ vouches for this product, and finally if there wasn't they would be reserved for HQ upgraded members with many hundreds to thousands of posts.

No offense, but I really don't suggest going around asking for VCs with an account like yours. You will only get -rep'd or given limited forum access for vouch begging on threads that say there are no more VCs.

As I say in the thread, I don't do this anymore because I'm working on building my whitehat businesses. I still get residual income from it (Every now and then a couple hundred bucks appears in my wallet) but I am only selling this to increase my reputation as a vendor so that I can sell my more expensive stuff (Consultant groups / Software / Services).

As I state in the thread, I'm more than willing to show you via Teamviewer my earnings from the time period I was actively doing this.

After setup, it will be autopilot for a time period before you have to do a little bit of work (Not much) but it is entirely possible to do setup and get it started and sit back for a month collecting BTC. As I said, I still get a little bit of residual income from the time I was doing this.

Yes, that is exactly what I'm saying. This is a product for people who RAT/distribute malware, so someone who doesn't RAT and has no knowledge about RAtIng/distributing malware should not purchase it as it would be of no use to them.

Absolutely. An issue with most of my clients is they aren't very tech savvy so setup can take a day or two for them. Of course they get it eventually either way though.

4-5 Hours a day of work is not necessary to achieve that. These methods are relatively highly autopilot, it's just the setup that takes a bit of work and then you're good to go.

You told me that you used the autobuy button which starts a contract. If I ever sent you an address, it's because I was under the assumption that you had started a contract. I have autobuy buttons for a reason, because it automatically starts a contract. Were you not the user that was having trouble with the shoppy PP payment? It is impossible to even get to my autobuy page without first starting a contract, so I don't know what you're talking about.

I apologize if I've confused you with a different user, but I never operate without contracts, so you must understand my confusion. I did not threaten you with being banned, I was telling you that you can be closed for posting a review without a TID-Linked contract.

Also, if you actually are one of my customers somehow (I wouldn't know how since we don't have a contract) then you MUST use the support that I've hired for you guys. I am a very busy person in many regards, and this is why I hired support for you. If I am not available at the moment, then why not contact them? Isn't that the point of me paying them, so that you guys can get support when you need it?

I don't want your ebook, if you read it I asked for the idea of the method like you told me to, you said to ask your customers fugging idiot. You telling me to rent Rig EK and traffic is not your eBook too. You never have got 900 bots "daily" from spreading and you even are buying bots from RCE because you can't spread.

Also I'm curious since you keep mentioning to me Exploit Kits, what is your name on Exploit? I will be glad to post your foolishness from here, there.

And one more thing, you constantly are selling to people without Contracts. I will make my report privately to staff, about this too separately because it is a separate issue.

Xavier - October 28, 2019, 2:21 pm

Also I'm curious since you keep mentioning to me Exploit Kits, what is your name on Exploit? I will be glad to post your foolishness from here, there.

1) "you said to ask your customers fugging idiot."

I said to ask them how they're doing, not to ask them to leak the ebook to you.

"Hey, I am skeptical about this guys' product, I wanted to ask how your experience has been. Are the methods working well for you? Are the figures correct? Are you earning anything, what does it

generally involve" is VERY different from what you asked: "Can you send me the method".

2) "You telling me to rent Rig EK and traffic is not your eBook too"

No, it's not. You implied that 900 slaves / day is some crazy, unreachable amount. I told you that you can easily do that by getting RIG. I don't recall telling you that RIG is in the eBook (That's not a private, investment free method). Why would I ever tell you, of all people, the private methods for free? You already asked someone for a free copy, why would I trust you with these?

3) "you even are buying bots from RCE because you can't spread."

I want to see the quality of his loads with a small order, what's the issue here? I don't understand how an order for 200 loads suddenly destroys the credibility of my product. (Especially given that the order was placed a month after the release of this)

4) "what is your name on Exploit?"

Why would I give you my Exploit account to continue harassing me there? I have nothing to prove to you. You aren't interested in buying, you're interested in letting your anger out and asking for free copies, I don't want anything to do with you.

Again, you can insult the quality of a product you've never actually purchased all you want, but the market doesn't agree with you. Where are my disputes? Where are my negative B ratings? If my vouches are fake, how do I manage to obtain so many vouches from UB3R, L33T and V3NDOR accounts?

Just go away. What is arguing going to do for you? You haven't even seen the product.

Swado2times - October 28, 2019, 2:34 pm

Yes because you are a liar. You never have gained 900 bots daily from spreading. It's just a fact which we all know, because you are a fool. I don't want your eBook, I just want to know which method you have there for spreading, not your eBook guide on how to set it all up. Because imagine, you even told me to hack websites and replace their exe files or something similar, and you call this a spreading method? And you say to me to rent Rig and buy traffic, this is also not a spreading method, so why did you mention it? So I asked your customers which you did tell me to do.

I don't want or need your crypts which is sold in your eBook why didnt I ask for that? I don't need your "tool" which is included with your eBook why didn't I ask for that? I don't need your tutorial on how to make money from bots on your eBook?

Next time never false advertise on Hackforums again and you will not have any issues. Take this as a lesson and learn from it.

Also you are wondering where your negative B ratings, you dealt with multiple people without contracts so far as I can see on the thread. So hopefully my report to staff about this with evidence will solve your curiosity in relation to that.

I hope you know that you can have contracts with people and they won't have the postbadge because the TID wasn't linked on the contract, but the contract still exists. Make a list of which individuals I "Don't have contracts with" and go to my contracts, there is a contract for every single one of them.

"Take this as a lesson" Take what as a lesson? I don't understand what you're trying to get across. Every individual I have dealt with has a contract and not a single person has filed a dispute. You haven't seen my product yet you are salestrashing it and claiming false advertising, you're delusional.

Alright buddy, go ahead and send your "detailed report", every contract is there.

<https://hackforums.net/contracts.php?uid=4192973>

I know your mistake, you are looking at my B-Rating page and not my contracts list. You're also probably looking for the TID-Linked postbadge. I don't understand how I would be able to try and hide uncontracted deals that occurred in the past either.

I didn't realize I'd get somebody all wiled up just by calling them out for begging my clients to leak my paid methods.

Your accusations that I'm "false advertising" aren't supported by anything besides your own imagination.

- 1) You saletrash my thread, saying all vouches are fake a week ago (Unsubstantiated).
- 2) I offer to show you proof via Teamviewer (Which you don't reply to) and that you can contact my customers and ask how they're doing.
- 3) My client tells me that you asked him to leak the methods to you, and provided a screenshot proving this.
- 4) I bring this up you at which point you say that my method is shit because I refuse to tell you what it is.
- 5) You come onto my thread and then claim false advertising on a product that you haven't seen, completely disregarding over 47 positive B-ratings with zero disputes because you somehow know better than the people who have bought it.
- 6) You then claim that I am selling outside of contracts with no evidence whatsoever.

No, you are 100% mistaken thinking that I am mixed up.

You have sold this eBook to multiple people without contracts and I have evidence.

Maybe not everyone is as satisfied as you say. Maybe thats why they can't leave a -B rating. Hmm?

Well if that's the truth then go ahead and send your "Report". My thread has an autobuy link bud. If somebody wanted it, they could buy it without me even speaking to them. If they didn't like it, then they have a contract automatically generated for them. I even have a refund policy, if someone doesn't like my product then they can get a refund.

No extra investment necessary. The only Opsec I would recommend is a VPN (And you can get these for free). You can expect to start seeing a return in 24-48 hrs or less, I've seen clients make over 200 USD in the first 24 hrs. Yes I sell this on N****d (I stopped sales there) and C*****d.

Hi all! I just bought this and it seems like an amazing method. Obviously you'll have to do a bit of work, but it seems like it could work for the right people.

Just wanted to chime in that you DO need a Windows machine to make this work, as there is a .exe that you'll need to run for setup. Unfortunately I only have a Mac and won't be able to use the method.

@OP: so i read all 22 pages of this thread and i have few questions that i want to ask here, because you might be busy on discord/telegram.

- Do we need to target a specific type of victims ?
- Do the method need to be repeated once in a while (eg: not spreading anymore)
- As someone who doesn't know sh*t about spreading and a crypto noob, do you guarantee to make 150-200\$/week ?
- Do you agree that if i do not make at least the investment (method price) in the first 2 weeks, with ELITE + mentoring, you will full refund ? (a bit noobish, but i have to assure because there are many methods that are sold with high prices and give 0 results)

From reading 22 pages of this thread. I have concluded that you're using a BTC stealer. Now my question is does your stealer handle 2fac accounts? Or just those unprotected wallets/accounts?

Do you need to have your own .doc exploit? If so would you recommend one?
Would you be providing the loader aswell?

So just getting done setting it up. I will not lie, if you dont know anything about coding or computers

it will be very difficult. The support is okay but there are a lot members so you will have to be very patient. Most of the methods are not autopilot, but they are unique and I believe HQ still. (This is where the main values at, along with the discord) I will try them all extensively tomorrow and write a second portion to my review.

Also there are autopilot methods he provides for sure dont let the wording misguide you

(This is where the main values at, along with the discord) I will try them all extensively tomorrow and write a second portion to my review.

Also there are autopilot methods he provides for sure dont let the wording misguide you

While I appreciate you taking the time to write a review, I have to disagree with some of your points.

1) "If you don't know coding it will take a long time"

This is very, very misleading. I don't know how to code in anything, and it took me 10 minutes following the tutorial to build the software the first time. No coding experience whatsoever is needed, you will not write a single line of code. Moreover, if you are having trouble, I will do this part for you in five minutes. Zero coding experience is necessary. Again, I want to emphasize that I will do this part for you in less than five minutes if you ask.

2) "Most of the methods are not autopilot"

Again, I disagree with this 100%. There are very few methods more autopilot than these. Once you do the small bit of setup work that they require, you literally just sit back and earn. You can do the setup in 24 hrs and then do absolutely nothing (Literally not touch your computer) for several weeks and continue to earn throughout that time period. Autopilot means that you earn automatically after setup, and these methods fall into that category. The malware works for you, you don't have to manually retrieve BTC from the bots, because the malware automatically does it for you.

3) "You have to be patient with the support"

While I do not ENTIRELY disagree with this as I am busy, most of the time people choose not to contact my support team or other members and instead wait solely for me to respond. Of course it is going to take longer to get help this way if one does not contact the team. Sometimes it may take a few hours until I start responding, but I spend a lot of time with you guys.

Again, I appreciate you taking the time to write something, but several of your points are very misleading for the reasons above. I kindly request you edit them. If you don't agree with what I've said, please contact me and I will explain why.

Here's my totally honest vouch a week later after purchasing Elite.

From the start Xavier seemed like a really nice guy. He answered all my newbie questions, explaining everything and gave me clear instructions on what i gotta do. I paid for some extra services that are not found in the guide (i asked for this) and he did all the setup for me, leaving the spreading method on me. Here comes the negative part. After you purchased it, his interest in helping you is slowly starting to decrease. Can't blame him though, gotta focus on the new and the potential customers, it's all business. There is a support team hired for assisting you, but now (as an already existing customer) i have to wait between 3h to 24h to get an vague response to my question (and trust me, you'll have a loot of questions).

There are 3 methods found in the guide (with the Elite package). Method 1 - I think it could work, haven't tried it yet. It involves a little bit of work and great SE skills. Method 2 - I don't think this works anymore. Me as well as some other customers can confirm this. Xavier told us a tweak to this but it's still not working as it should. I think this must be replaced somehow. Method 3 (Elite) - It could work great, i see potential in it, but to make this work you have to be experienced in hacking. There is no way in the world a newbie like me (who found about malwares and stuff like this into this guide) could make this work with no support (or even the low quality support that it's provided)

So the summary is

The malware itself works, i have no doubt you can make good money from it, but for this to happen you require 2 things:

1. Be experienced in hacking (or not totally new), or having PC knowledge in general.
2. You gotta be creative and think outside the box. As i've told to Xavier before, you really can't expect guys like me who literally have 0 experience with this kind of stuff to take things in their own hands and improvise the methods, or even make their own ones.
I've been told (i quote him): "If you have Elite, you'll be taken care regardless of the experience". It doesn't seems like that so far. I really hope the support team will actually PROVIDE support for the members in need instead of flexing with the money they've made.

If you are not new to hacking, go for it, i don't think you'll regret it. You'll earn.
If you are totally new to hacking, i would think twice.

I'll gladly edit my vouch into a positive one if anything changes.

There is no way in the world a newbie like me (who found about malwares and stuff like this into this guide) could make this work with no support (or even the low quality support that it's provided)

So the summary is

The malware itself works, i have no doubt you can make good money from it, but for this to happen you require 2 things:

1. Be experienced in hacking (or not totally new), or having PC knowledge in general.
2. You gotta be creative and think outside the box. As i've told to Xavier before, you really can't expect guys like me who literally have 0 experience with this kind of stuff to take things in their own hands and improvise the methods, or even make their own ones.
I've been told (i quote him): "If you have Elite, you'll be taken care regardless of the experience". It doesn't seems like that so far. I really hope the support team will actually PROVIDE support for the members in need instead of flexing with the money they've made.

If you are not new to hacking, go for it, i don't think you'll regret it. You'll earn.
If you are totally new to hacking, i would think twice.

I'll gladly edit my vouch into a positive one if anything changes.

EDIT: I spoke to this user in private and he failed to notice some links and a video tutorial that I attached to the private group.

Thank you for the review. I disagree with a couple points (This can all be done by even the most beginner hacker, it is not difficult whatsoever and all of the info one needs is publicly available. This isn't even considered hacking, it's considered skidding) and also your criticism of the support time (How is my support guy supposed to provide support when he's in class / driving?)

You do NOT need to think outside the box with these methods at all. The instructions are very clear. You do not need to be creative at all, I give very specific instructions for you. If you think that these methods are difficult / require creativity, I suggest you go and find other spreading methods online, you will be beyond lost.

These are very, very beginner-friendly methods in spreading. You don't need to know how to write a line of code or how to do SE. Not many user's have as many trouble as you do despite a similar lack of experience.

No investment is necessary. It may seem too good to be true but I have zero negative B ratings and a refund guarantee if you don't make an ROI in 1 week.

Replied, thank you for asking for support off-thread. It is annoying when people ask for support on the thread rather than with the link I give them to my support team / private group.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

i regret buying this. waste of money.

Apart from buying this I paid extra for 100 bots and only got a little btc out of it which didnt even cover what i spent.

All the claims and good feedbacks are fake.

Attention Buyers

My room mate relapsed on meth this weekend and made everybody leave the apartment since I tried to stop him, I didn't have a choice since I wasn't on the lease. I was homeless Saturday night (Slept in my car) and spent all day Sunday finding a place to stay. I'm finally settled (At least for a few days). If you are waiting on an undelivered service that was due whilst I was gone, I am open to full/partial refund (Depending on each individual case. For example, if you paid for the Elite package and haven't received a crypt yet, I cannot offer a full refund but only a partial one since you still have the rest of the package). Please be patient with me as I have many, many messages to sort through on multiple platforms.

I'm sorry if your experience hasn't been ideal, but I have positive reviews and B ratings from 7+ year old, UB3R, V3ndor, and other L33T+ accounts. I cannot fake that. I have no negative B ratings at this time. People are making money with it, I know this because I spend 6+ hours a day

talking to my customers and guiding them.

I'm sorry if the bots did not produce the results you expected, but you received them.

This is a trash service, I legit have guys on his discord saying he did this in past on Nulled and got banned for it. I'd really like an admin to look at these claims I have screenshots. Multiple people haven't gotten what they paid for. I asked for a crypt over 5 days ago. The discord is starting to blow up with unhappy members. I'll bite the \$50 bullet and take the L. But this is a legit scam. And "ANY" user claiming to have made money off this why haven't ANY of you posted in the discord when several members were asking if anyone had legit proof of making even \$1. Not 1 person could post 1 proof of making money in the last week. The methods are extremely outdated. (Freelancer, bitcoin talk, etc) this honestly isn't a sales bash..

I'm pissed Xavier can respond on here trying to look legit when in fact he's a fraud. I would really like an admin to contact me so that I can show some proof to my claims and get these items removed so he doesn't collect off of others

If anyone would like a screenshot of my experience before you buy go ahead and PM me.

If you want to make this right you can refund me my money since I never received a crypt or support when I asked in the discord. But I doubt I'll ever see that again

Lawes8 - November 5, 2019, 11:31 am

THIS IS A BIG ASS FRAUD

I'll write a summary on everything that's going on so everybody can see it, including Xavier, I don't give a damn if I leak anything about his methods, I'm ready to suffer the consequences, I just wanna see this guy banned.

The stealer, which is meant to replace the victim's btc add with ours is actually using someone else's addresses, which are FILLED with bitcoin.

Short story, so everyone can understand, he fooled us so we'll spread the virus from him, everything leading to his addresses. Xavier is claiming that his customers have made money from this, where are those customers? There was only ONE guy (which was from the support team) that posted like 3 times in the Discord server a photo with a bunch of cash. Over and over again, could have been from anywhere. There is not a single guy in the whole Discord group that made money from this. Why? It's not working. I mean it is, but for him. From what we know, we even might have RATs in our PC's.

Leaving that besides, almost everything Xavier advertises in the guide is FALSE. There is no such thing as 1 on 1 support, there is barely some support at all. There is

literally not a single customer who got successful with this. The methods he provided are outdated AF. The files he provided are outdated AF. Even if the stealer worked as it should you still had to pay extra or to take crypting lessons to make this work.

He always claimed that he had no B Negative ratings and no open disputes, why? It just took a while for us to understand what's going on.

OP also did some similar scam on N**L*D and now he's banned there.

I'll open a Dispute and I want to be contacted by an Admin. I can support my claims with screenshots. There are also a lot of members who can back me up on this.

idk what you expect, as long as you give money you are protected by half the freaking community from scam accusations with no shame. This guy is a serial scammer scamming under the same handle across multiple forums, but god forbid you "shit on someone's sales thread".

Please read the entire thread from beginning to end before you make a conscious decision to buy this.

There are a lot of ways to throw away your money and this is right up there with "in the garbage".

squin - November 7, 2019, 1:21 am

Xavier is selling outdated methods that couldn't bring the advertised profit, no matter which method is applied or how many resources are invested into the methods, it's very hard to make even small amounts, let alone big money. The support included in what the vendor is charging is basically non-existent, the people left on his discord are disappointed customers. Furthermore, from the little help the vendor offered, people got infected and ratted through the software Xavier provided. I don't expect my money back, I just want everyone to stop from buying this crap and save their money.
