Thread: [BitcoinFactory\[uid=4394402\] reselling public scripts / AmHereToHelp MultiAccount](#)

TCP - September 30, 2019, 7:01 am

The following member is reselling a public script:

<https://hackforums.net/member.php?action=profile&uid=4394402>

The script in question is the x90 script for bustabit which you can find here

<https://pastebin.com/yX86H4hQ> and <https://pastebin.com/q1SSGMEv>

I made the script for him some time ago now he is back after scamming a lot of people, his previous account was:

<https://hackforums.net/member.php?action=profile&uid=4192046>

He is "vervainagospoda" on bustabit, he is known as "djordjamayna" on bitcointalk he is a serial scammer from Bulgaria

I have the full dox on this individual(even his face) which I can send to staff if interested

His youtube channel <https://www.youtube.com/user/darknuke08/>

Yeah seems like his scripts are kinda trash too, so many complaints. You and him are the only ones selling bitcoin scripts right (asides from yours being legit lol)

The concept of hitting x90 is actually quite interesting but the performance of this specific script is not.

In origin it worked good for some days then it busted, however after that he went into a scamming spree

So I will continue to report him as long as he is back

Yeah, I heard one guy who bets like 900 bits or something every day 24/7 on busta and only

cashes out at like x90 or like x1000 and hes 8 - 10 bitcoins profit (probably more since I have not been on busta for a long time)
