Thread: [Searching for keylogger/malware \(pdf,pic etc\)](#)

Minaise - September 30, 2019, 2:19 pm

Hi guys,

Looking for a keylogger/malware etc what can I send to one person thru protonmail,mail,wickr etc. Ideally would like to know his location(i dont know, he definitely has VPN so manly this is out)? His gredentials would be nice(email, social media etc) Has to be well masked for maximum OPSEC and has to work from backround.

Budget: Not much but will look closely to every offer.
Surfed the web and free stuff are old/incompetent/full of malware themselves

Afterwords I dont care if he finds out or not, he finds out aventully but not before I will catch him.

So guys..show me your cool new aruff!!

Cheers from
Team Anarchy

Are you asking for a custom backdoor? It's not cheap. Your best bid is using hf keyloggers but most of them are not fud runtime.

Minaise - October 1, 2019, 12:08 am

Hi,

I dont need a custom. I just need a person identity, maybe pic etc.

True email then(.jpg, pdf)
Has to be sent thru protonmail, wirckr etc

Cheers

These is no such thing as jpg exploit.. DO NOT GET SCAMMED!

Search for ms office poopup macro.

Minaise - October 1, 2019, 12:55 am

Hi,
Ok thanks for the info.
I dont now nothing about keyloggers. Every info is welcomed.

Still waiting from here also whats offered!!

Cheers guys

i can solve this problem. i can setup the tools ready for operation. do you mind if we make a quick test ?

.....
I can setup a good stealer that sends email and pass to your email. fud it and exploit it to pdf ready to spread at cost \$200.

Hi bro,

What operations the the ? or your programm will do?
Ofcours we can test it with a new default email..

What file has to be engaged? Tell me more pls..in PM maybe

Thanks!!
