If your only interest is views, then go ahead and buy.

If you're expecting sales based on the fact he has the views sent to his ewhore account, I wouldn't bother. 0.75% conversion rate based on 400 views. (3 sales)

Seller was also rude because I questioned the poor conversion rate.

How is your conversion rate any fault of the traffic seller? Isn't it up to you to convert the traffic that you get? If you got 3 sales out of 400 views, that doesn't sound like there's any problems with the traffic.

That's his conversion rate.

Presumably being able to bring in "HQ" traffic and unable to convert them seems odd.
