Thread: [BlazinHosting, Lies, Deceit and Unprofessional](#)

Vitaly - October 2, 2019, 3:53 pm

Edit: Because I opened this thread warning people, Blazin has deleted my account on their website, meaning I have 0 access to the domain I purchased through them.

Edit #2: So I emailed SpamHaus again telling them I have now removed myself from BlazinHosting's hosting and guess what... SPAMHAUS REMOVED ME. This literally proves @Blazin was lying the whole fucking time. DO NOT BUY THEIR HOSTING IF YOU WANT TO USE IT FOR ANY LEGITIMATE PURPOSES <https://imgur.com/a/uMFXOp6>

I'll have a TLDR at the bottom of this post.

On the 27th of September, I purchased a domain & hosting from BlazinHosting. Once the hosting was up and running, I noticed that when I visited my domain it would say the website was unreachable and would give me a few errors when trying to reach it, every few hours it'd start working and stop working again. I did some messing around and found out that for some reason, the website was only reachable in certain countries (I used geopeeker.com and a few countries, like Singapore, where the server was located could reach it, but countries like the UK could not.) anyways that was fixed; I just thought i'd add that.

On the 29th I found out that my domain was flagged by Spamhaus, I contacted BlazinHosting and they immediately started deflecting blame, saying it wasn't their fault and I must have been doing something shady and that was the reason. I know for a fact I wasn't doing anything shady and my website was totally clean.

I emailed SpamHaus and asked for the reason I was flagged and they got back to me stating that the reason was because of the Hosting that I was using, and that the hosting I was using is known for being used for Illegal things, such as botnets and phishing and that's the reason I was flagged, and that if I change hosting I would be unflagged.

Before I told Blazin that they got back to me and said it was due to his hosting he said, and I quote. "Spamhaus does not lie."

After I told him that Spamhaus THEMSELVES told me it was due to his hosting, he states "how can it be my hosting, if my hosting isn't flagged"

Luckily for him, they seem to of managed to unflag their hosting IP, as yesterday it was flagged on spamhaus, I should of taken a screenshot lol, you can see he somehow resolved it by going to the case number <https://www.spamhaus.org/sbl/query/SBL460755>. let's see him try deny it.

But you can see just by searching the IP on google it has hundreds of reports and has been listed on spamhaus before 103.116.16.173

Blazin states that no other domains on his hosting have SpamHaus reports, but just by looking at the domains on their IP you can see that isn't true.

When I first commented my negative experience of BlazinHosting, he tried to discredit my refund by

saying I purchased 1-2 weeks ago and that I was out of the refund time, however it had been 2-3 days, not 1-2 weeks.

Blazin also tried lying saying I am inspect elementing the replies Protonmail were sending me, so I'll be uploading GIF proof of me refreshing tomorrow.

TLDR: BlazinHosting got my domain flagged by SpamHaus due to them hosting botnets, phishing etc and then tried to shift the blame elsewhere and started to make up lies to try and discredit me.

<https://imgur.com/erua3H4> - Blazin lying saying I bought 1-2 weeks ago when it was actually 2-3 days.

<https://imgur.com/N6yCy0s> - Proof it was 2-3 days

<https://imgur.com/JsxjloX> - SpamHaus TELLING ME I'M FLAGGED DUE TO THEIR HOSTING, HOW IS HE GOING TO SAY THEY ARE WRONG AND LYING LOL

<https://imgur.com/WPs1Xuq> - SpamHaus AGAIN confirming it is their hosting, after I asked them to double check and said that my hosting provider said they are clean

<https://www.spamhaus.org/sbl/query/SBL460755> - The link to the case of the hosting IP being flagged yesterday, but blazinhosting has somehow managed to get rid of it, i should of taken a direct screenshot.

Here are some links showing the IP is flagged and has been flagged my spamhaus + other companies before

<https://urlhaus.abuse.ch/host/farnbrands.com/> (You can see other domains on the SAME HOSTING IP THAT ARE FLAGGED)

<https://cleantalk.org/blacklists/> 103.116.16.173 (had to space the last part of links because formatting error)

<https://www.abuseipdb.com/whois/> 103.116.16.173 (had to space the last part of links because formatting error)

<https://ipinfo.io/AS137870>

<https://otx.alienvault.com/indicator/hostname/weboffice365.net> - proof the IP is their domain, you can see their name servers on it lol

Anyways, it's clear he is in need of money and insanely stubborn and tries to fabricate things, I just thought i'd post this to stop anyone else from falling for his trash hosting and getting scammed.

Why is this thread being constantly locked up?

It's to let people know and warn them of the hosting, no need for it to be open and spammed
