Thread: [\[Help\] Cloning HDD to SDD /Solved](#)

Crimin4L - October 4, 2019, 11:50 am

Hey, is there anyone that can help me clone my HDD to my SSD right now? I'm having trouble and really need the help with the partitions and stuff. Would greatly appreciate it!

Discord is Crimin4L#1337 so we can chat easier!

Hello,

Take a look about Easeus, I used it once, worked perfectly

It's free :)

datguy.dev - October 5, 2019, 7:03 pm

I use bootable Clonezilla. Clonezilla will create a 1:1 copy of the drive so no need to fiddle with partitions etc. You can use bootable Gparted after the fact to extend your partitions if needed.

Thanks my man, I already did it with the one Crucial offers. I tried it with Macrium Reflect at first and it didn't work, my SSD R/W speeds were at 100 MB/s when it was supposed to be 5x that.

So I deleted all partitions on SSD and re-cloned the drive with the Acronis for Crucial and it worked perfect like a charm :)

I personally always use Acronis. I only buy WD SSD's for this reason. I work in an office where

when I upgrade drives or upgrade computers, that cloning feature is super helpful. Otherwise its one by one resetting every last setting.

Also to add:

WD Version: <https://support.wdc.com/downloads.aspx?p=119>

Crucial Version: <https://www.acronis.com/en-us/promotion/CrucialHD-download/>
