That's a very fast response, I'm quite impressed xD

I have been in business for quite a while, and my ban rate is legit way below 0.01%, and in the off chance that any account does end up getting banned, you have an easy 3 months warranty and I

am available almost all day everyday, so your replacement will be quick and easy.

Appreciate your interest <3

Long story, I flamed a guy who was posting porn in the chat, I then flamed him and said that children/teens play the game, and because RIOT has bots, it just flagged up my bad language and perma banned me.

League hates flamers more than actual trolls who run into people for fun

I Have played league a long long time, and i never ever heard of a perma banned for that straight away, its 3 strikes my friend is always toxic and he gets chat banned, not account banned strange, ? if this is your first offence and it really was that i would dispute if you were botting on it then thats a diffrent story.

wrong, i went from a clean acc to a 2 week ban (i think) with them saying this was my only chance, 2 years ago. cant remember exactly but they skipped the chat restricts and went straight for a harsher punishment
