Thread: [ComeOnMyG UID 4289210 multi accounting scammer](#)

Humpstead - October 5, 2019, 10:26 am

He's the Bulgarian scammer back again for anyone who doesn't know him he keeps coming back, aging his account a little bit, buy's a few awards and L33t and then puts up a bunch of shitty "methods"/betting scripts and exit scams.

[Hack Forums - Profile of ComeOnMyG](#) changed his name multiple times today and probably will change again

[NOT FOR SALE ANYMORE THANKS](#) Closes thread after I expose him

[50-200\\$ BTC PER DAY MONEY MAKING METHOD {100% PRIVATE AND WORKING} - 4 COPIES ONLY](#) Literally exact same thread layout as his other account "BitcoinFactory", check my post to see proof

[SOLD ALL COPIES](#) All of a sudden all the 3 copies apparently "sold out" within 3 hours after another user exposed him in his thread AND NO CONTRACTS WERE USED

Don't deal with this retard please. If you somehow get scammed by him you're an idiot.

If anyone wants to link up and expose another mass scammer/possibly more of this guys accounts hit me in the DM's

I am not sure if that's him, however the notorious bulgarian scammer aka "djordjamayna" will get a police report within some months we're working on it

I can assure you OP is correct. He's ironically messaged me on 2nd October, because he know I'm the one reporting his accounts and stuff.

hi old friend :)

Lol judging by John Rambo's posts it looks like one of his other accounts

Bluffer - January 24, 2020, 12:30 pm

Worthy of a bump as I'm 100% certain this is his last account:

<https://hackforums.net/member.php?action=profile&uid=4198136>

Sold me "ownership rights" (<https://hackforums.net/contracts.php?action=view&cid=132299>) to a Bustabit script, ended up trying to extort me (so he wouldn't share it publicly) - didn't work though - and stealing my money because even after I bought "ownership rights" he was giving it away to people for free and also selling it. And he also was trying to get another member to sell it for him here in which that member admitted to me it's same script so same guy.

<https://hackforums.net/showthread.php?tid=6043577>

I have a shit ton of evidence based off long conversations had over the last week with guy, but just as OP here has explained he's changed his username after this account has been open for a few months (since July) and upgraded the account and started selling bullshit methods.

Well done and thank you for the warning. I'm pretty sure someone will recognize his next account. And I'm sorry for your loss.
