Hello,

In this thread you can follow me in my journey to solve my financial situation.

Avanza stock exchange.

Value: Approx 5875 SEK (~596.9 USD)

Lost 3335 SEK (~338.8 USD) so far, the stock died pretty much and I have refused to sell for a loss.

Total funds that I can spend: 889 SEK (~90 USD)

The day I get my salary: 25th of the month

Monthly income: Approximately 10 800 SEK (~1100 USD)

The rent and all bills has been paid, the money I have is strictly for food, nicotine etc. These are all my bank accounts, credit card accounts and stock market accounts. If something would happen then I will be forced to sell my stocks for major losses.

My hopes is to come back here before the end of 2019 and prove that I did it. Thank you for reading.

QKRLDN - October 6, 2019, 10:49 am

I wish you all the best, I'm also pretty broke at the moment but I'm hanging in there. I have a couple of business ideas I may pursue to try and get my income up.

4L CAPONE - October 6, 2019, 11:19 am

Good luck man, just keep on pushing through

When I quit smoking cigarettes I began saving about \$30 USD per week.
That's roughly \$1560 per year saved.

I also switched low-wattage smartbulbs in all of my lighting fixtures that should save me a few hundred more per year.

I quit buying beverages and began using water filters, that adds up REALLY fast.

Good luck with your journey mate!

I highly recommend quitting smoking, you'll save a lot of money...

I wish you good luck OddRoads. I myself have good financial security, but even I examined my own expenditures in order to save a bit. If I were I would get rid of the stock exchange account. There are no short cuts, BitCoin does not work either contrary to what HF people might say.

HunterXO - October 8, 2019, 9:08 am

good luck. you'll definitely need it (:

Good luck man, make plans & solve your issue.

Once it's solved don't celebrate and blow your money again because then you'll have to solve it every other year.

Learn from your mistakes & start putting money aside so that you'll hopefully never have to count the penny's as much as you have to now.

I fucked up...

Everyday Plus: -2500 SEK
Ecster: -14000 SEK
Skandiabanken: +3900 SEK
Avanza: ~ +3500 SEK
Swedbank: 0 SEK

I am expected to have about 15000 SEK (maybe \$1500?) as spendable cash, and 16500 SEK (\$1650) in debt. I do however have good news: I got a new extra job and it pays very good. Did 7 hours yesterday and for that I got about \$350. I will try to work as much as I can at that place lol.

Thank you guys for your support. I am guaranteed to lose this "challenge" unless a christmas miracle happens. I will still update this thread when I am done though, I think maybe in February or March.

Merry christmas!
