[*]

FAQ

Spoiler [\(Click to View\)](#)

Q: What is IonMine coded in?

A: IonMine and its components are coded in C/C++ and ASM.

Q: What engine do you use for mining?

A: Always the newest version of XMRIG.

Q: Can I mine on several computers with one build?

A: Yes. One build is not limited to one client machine. You can execute the miner on as many machines as you want.

Q: What is CureGem?

A: CureGem is an advanced persistence and recovery engine to detect and recover altered resources and ensure the lifetime of IonMine on the client machine.

Q: I want to use a third-party crypter. Are there any optimal settings to use?

A: Due to the deep integration of several algorithms, IonMine will most likely be incompatible with third party crypters. Please use the integrated crypter of IonMine.

Q: The integrated crypter of IonMine has detections. What should I do?

A: The stub is going to get updated 2-3 times a week to avoid signature detections as good as possible. Even tho you might face the issue of some detections. If this is the case, contact me.

Q: Does the integrated crypter offer FUD results?

A: The integrated crypter offers FUD or Semi-UD results.

Q: Does IonMine work on fresh installed XP boxes?

A: Yes. IonMine doesn't have any dependencies.

Q: Is it possible to get my own instances killed by the IonSeek Botkiller?

A: IonSeek touches everything except its own parent process.

Q: What is the benefit of using IonSeek?

A: IonSeek can help you to clean and protect the client machine from malware and other CPU consuming instances (such as other miners). More CPU cycles automatically result in better mining results. Additionally, you can make sure that the client machine only hosts one miner instance and uses its CPU power to make calculations only for you.

Q: I've recently executed a build on a lot of machines but I want to update the builds. Can I just re-execute a new build?

A: Yes. Due to the smart update function IonMine provides, you will be able to re-execute the new binary without any worries. IonMine automatically detects older versions of itself and updates it if required.

Q: Do you keep any logs?

A: We do not keep any logs.

Q: Is there a chance to not get banned by XYZ pool?

A: You cannot really avoid bans but you can avoid losing your client machines by using a proxy.

How to buy a build?

[*]1-) Click on the Buy button and fill the contract.

[*]2-) Go to the website to buy a serial then you will receive the builder link.

[*]3-) Fill the text box's with the required info.

[*]4-) Click into the Build button.

[Buy now](#)

If you run into any issues during the building process, contact me here or via Jabber/ partner skype.

Again: Enable Pop-Ups and don't close any window related to the building site until you receive your download!.

Zero-Log Policy: Since we respect our customers' privacy, we're enforcing a strict zero-log policy. This means your connection/order will remain completely unknown and anonymous. No IP, No Timestamps, No Data. Nothing will be logged.

Note: A contract is required to complete the purchase stages.

??¢??? - October 7, 2019, 6:46 am

I'd be happy to review this if you are giving away a vouch copy. Also, does it work both for *nix and windows or is it only for windows based systems?

RCE - October 7, 2019, 7:01 am

(Oct 7, 2019 06:46 AM)??¢??? Wrote: [\[CITE\]](#) I'd be happy to review this if you are giving away a vouch copy. Also, does it work both for *nix and windows or is it only for windows based systems? Thanks for your kind reply , this is not new software, it's just a re-release, there are tons of vouch's and reviews you can check it in the other thread.

It functions on windows based system atm.

Regards ?

Dark-Bot - October 7, 2019, 10:47 am

Someone bought me a review on this product

Think1st - October 7, 2019, 12:32 pm

can you pm me how this works and how effective it is new to silent mining very interested

SIMPR - October 9, 2019, 8:21 pm

posting to keep it on my lists for future buying

TEKNIX187 - October 9, 2019, 9:35 pm

Is.mining xmr still profitable anx good ? An estimate on running this on 200 decent quality bots how much would I make daily? Or basically does anyone have statistics or know how much this will make me with x bots?how long before I make my money back and how many bots would be needed to do it in how long? Like 100 consistently online bots at lesst how much eta min id make in a full week?

Trying to figure it out myself and use converters nutt not educated enough. On a low quality bot (or decent too) for example around at least what hash rate per second would it produce? So I can calculate profit, i want to at least know fhthd minimum id make daily if I got this running on at least 100-300 consistent machines

Yes it still profitable, there is no general concept for how much you will get per 100 machines because of the hardware is different from machine to other, but if you have consistent machines that

work at 100 kh/s , you will get 225.391\$ per week, and this will be a constant profit each week.

TEKNIX187 - October 10, 2019, 12:06 am

Example a shit miner with sloppily coded cpu consumption mining method way less advanced than yours i assume Idts say one bot a consistent day (10kh/s for example random number im ignorant in this area) so I can find an average per computer this runs on puts out how much basing it as default low end pc/bot) and calculate per.machines I am curious to find around how much id hays to invest into bots

(Irrelevant)

Ok sorry I started with voice to text but im so tired and stoned and this keyboard sucks this probably didnt make sense my bad but if you underdtand me and help I'm seriously considering buying this

Sorry mate, I hardly understand what you exactly wrote, but I assume you are asking the same question above, as i said before there is no 'default hash rate' for each computer, all depends on the CPU power, there are some websites you can search in google to calculate the hash rate and the CPU benchmark (for mining) based into its brand company.

Hope I answered your question.

rogerand19 - October 10, 2019, 12:34 am

Hi mate,

I am a beginner in this but im keen.

Would you help me to set this up if i buy this?

Can you help me to set this up on my own computer?

RCE - October 10, 2019, 2:57 am

Damli - October 13, 2019, 11:39 am

This looks interesting, can you give me a rough estimate of how much you can currently make per day mining XMR on an average low spec computer with your miner?

RCE - October 13, 2019, 11:46 am

(Oct 13, 2019 11:39 AM)Damli Wrote: [\[CITE\]](#) This looks interesting, can you give me a rough estimate of how much you can currently make per day mining XMR on an average low spec computer with your miner?

Thanks for your kind reply , as i mentioned before there is no static/generic rate for the profit per day because everything will depend on the client computer hardware, here is my previous reply to a question like urs:

"if you have consistent machines that work at 100 kh/s , you will get 225.391\$ per week, and this will be a constant profit each week."

If you cant send message here , add me on jabber or add my partner skype.

Bioflame - October 13, 2019, 5:53 pm

I have been looking at this product for some time, but I have a couple questions.

When I buy a stub, does it include FUD updates? Or am I just getting one stub that is currently FUD? Can I pay for recrypts (how much)?

When the stub becomes not FUD, is IonMine compatible with other crypters so I can make it FUD?
Can I get IonMine without the bot killing mechanism?

RCE - October 14, 2019, 1:51 am

@Twistd , The fun fact that you are reversing old build from 2018 probably version 1.0 which was the first version that have a lot of missing functions, however the most of your claims are false, this miner work with bidirectional protection, the end-user absolutely will not be able to remove the miner.

-CureGem provide multi verification and recovery layers which I explained in the thread design, idk from where you got the build but as I said it seems version 1.0

-The integrity check is not visible to you? oh i forget you are reversed a cracked build maybe :D

won't reply to the rest bullshi*t you write as its already false, also next time when you add me on jabber try to be more polite and avoid to be like a kid.

(Oct 13, 2019 05:53 PM)Bioflame Wrote: [\[CITE\]](#) I have been looking at this product for some time, but I have a couple questions.

The output builds from the integrated crypter is simi FUD , but you can use a good native crypter to make it complete FUD.

And yes you can get IonMine without botkill, just remove the botkill option when you building the miner.

Stanley - October 14, 2019, 4:01 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

RCE - October 14, 2019, 4:04 am

A new coupon with discount has been added only for HF users.

Enjoy ?

Twistd - October 14, 2019, 4:11 am

(Oct 14, 2019 01:51 AM)RCE Wrote: [\[CITE\]](#) @Twistd , The fun fact that you are reversing old build from 2018 probably version 1.0 which was the first version that have a lot of missing functions, however the most of your claims are false, this miner work with bidirectional protection, the end-user absolutely will not be able to remove the miner.

What on earth are you talking about? I never added you nor do I use jabber more than once every 6 months. You seem to misunderstand absolutely everything, but that's what you get for selling code that you have absolutely no idea about what does. If you actually were a coder rather than just paying other people to code your shit then yea we might have something to talk about. If you claim that your new bin are so much better than the one I have, why don't you provide me one and I'll verify that quickly? I sure as hell doubt it though as my bin is the latest released before it got shut down... You kinda fail to understand that you've got nothing to defend yourself with other than empty words against my reverse engineering, which means you'll lose pretty quickly unless you back up your claims with some code, new bin or counter-RE.

RCE - October 14, 2019, 4:28 am

@Twisted , you didn't add me on jabber ha? let me call you 'glimpse' , you just said that you own a build from 2018 so this will destroy all your claim's about functionalities and other features ? ? ?

Note: Try to write a reply to me without modifying it, because this behavior is not good for an 'experience reverse enginner' ?

This is my last reply to you here, it not worth to continue the discussion as you don't stand in a true base.

if you want a sample show some respect and come on jabber then ask me politely to provide one.

Regards ?

SK-x47 - October 14, 2019, 9:59 am

What is the proxy option for in the build section? Is this if we have our own proxy installed?

RCE - October 14, 2019, 1:31 pm

(Oct 14, 2019 09:59 AM)SK-x47 Wrote: [\[CITE\]](#) What is the proxy option for in the build section? Is this if we have our own proxy installed?

This is a stratum protocol proxy if you are using proxy with the xmirg miner (which need additional server/host) , in most cases you will not need this option.

That's what i've trying to get it to work for but hadnt had any success so far

RCE - October 25, 2019, 1:46 am

(Oct 24, 2019 04:18 PM)sfmvipier Wrote: [\[CITE\]](#) does this work with minergate?

Yes it works , also i've noticed some people add wrong info and options , for example, don't enable proxy if you don't have one, and make sure that the build will work only in real systems not vm's , also make sure you add the right password(if you have).

DadForce1 - October 25, 2019, 10:04 am

(Oct 24, 2019 08:29 PM)Venom101 Wrote: [\[CITE\]](#) That's what i've trying to get it to work for but hadnt had any success so far

right so i noticed there isnt a spot to input the username on the build which leads me to believe its going to just be mining for nothing because minergate wouldnt know exactly what account the payments would be sent to unless the pool is designated only to your account. idk honestly and am trying to get better answers before i go about making the build.

SIMPR - October 25, 2019, 10:30 am

(Oct 25, 2019 10:04 AM)sfmvipier Wrote: [\[CITE\]](#) right so i noticed there isnt a spot to input the username on the build which leads me to believe its going to just be mining for nothing because minergate wouldnt know exactly what account the payments would be sent to unless the pool is designated only to your account. idk honestly and am trying to get better answers before i go about making the build.

in XMR Address input the account email thats how it should be but i messed up multiple times on

not unchecking proxy from build due to the seller not notifying me about it on time.

Deflate - October 25, 2019, 12:04 pm

In past there was a same miner coded by other guy probably and it was including same features as you mention just it was IonMine Hella and author disappear from everywhere? Is this the same project or no?

RCE - October 25, 2019, 12:06 pm

(Oct 25, 2019 12:04 PM)Deflate Wrote: [\[CITE\]](#) In past there was a same miner coded by other guy probably and it was including same features as you mention just it was IonMine Hella and author disappear from everywhere? Is this the same project or no?

Its clear from the name its the same miner with an improved and some fix's , so yes this is the same project.

Frustsammler - October 26, 2019, 5:38 am

Pn me please i m very interested in many kinds of your service

RCE - October 26, 2019, 1:32 pm

Update:

I'm busy until the next 15 hours, so anyone needs some help you can add my partner in skype.

Xoek - October 26, 2019, 11:12 pm

Hey, I'm very interested in this but I'm new to how it works, could you pm me an explanation on how it works and how I would get started if I were to buy it?

SIMPR - October 27, 2019, 1:41 pm

(Oct 26, 2019 11:12 PM)Xoek Wrote: [\[CITE\]](#) Hey, I'm very interested in this but I'm new to how it works, could you pm me an explanation on how it works and how I would get started if I were to buy it?Hello it should be pretty simple even though i ran into some issue previously i found a solution that it's still in progress

nevertheless its as simple as having the the pool and port and username aka xmr address

once you create the build then all you need to do is run it on computers that you have access to and permissions aswell

4pair - October 27, 2019, 3:32 pm

That is so simple that even a child with a candy can do it. ? ?

exploit.exe - October 27, 2019, 3:35 pm

Does the \$30 build miner FUD runtime?

SIMPR - October 27, 2019, 6:17 pm

(Oct 27, 2019 03:35 PM)Nanite Wrote: [\[CITE\]](#) Does the \$30 build miner FUD runtime? is detectable but only by 2 of like 40 AV

But again you can always use a good crypter like Nyan cat to get it Fully Undetectable

(Oct 27, 2019 03:32 PM)4pair Wrote: [\[CITE\]](#) That is so simple that even a child with a candy can do it. ? ?

Correct but be aware that i messed up one time and then the second time i messed up because OP didnt stated that checking on proxy can cause issues with the build

Kayfox - October 28, 2019, 6:51 am

ok can i get a new key like you stated in the msg?

when you back please and thanks

SystemGhost - November 4, 2019, 4:37 am

Just realized the proxy feature was selected when I built my copy. I haven't had a chance to test it yet... would that mess up its ability to connect to just a regular pool?

maquinote9898 - November 4, 2019, 8:12 am

Is there any tutorial on who to fud properly and use it good?

RCE - November 5, 2019, 3:31 pm

Update:

Recently we got a lot of spamming messages mostly it comes from our competitors, also we have noticed that they have their own allies and multi-accounts here to post false info about our

softwares. we just want to note that all this fabrication just to ruin the sales and each one posted any reply contain a type of non-acceptable/hate speech he has never dealt with us before. they just come and write a fake bad review without even provide any proof to confirm their claims.

and the last thing is , if i was offline/busy on jabber you can add my partner on skype.

Regards.

ReduxJS - November 12, 2019, 2:21 pm

Lots of bad reviews on here that I see. Doesn't look so well.

RoboRobber - November 18, 2019, 8:47 am

start contract pm me please RCE

opsplayer - November 25, 2019, 6:05 pm

Is this supported for the upcoming monero fork on nov30?

kolyacz - December 6, 2019, 2:02 am

Is this thread still alive? Thinking about purchasing miner but looks like it's been quite here for a while.

Haarp1009 - August 16, 2020, 11:47 am

It looks nice. Doesn't support GPU?

otroyomismo.indet - October 6, 2020, 5:18 pm

I bought your miner last night and the link you gave me to configure it does not work, any solution bro?

Solved, thank you.

octane567 - October 16, 2020, 7:13 am

Would love to see more current reviews, and possibly be a reviewer myself hehe!

Does this require admin priveleges?

donaldemes - October 20, 2020, 5:46 am
