Thread: [drankadranka UID 4223445 multi account scammer+Fake vouch for Xaviest UID 4192973](#)

After exposing ComeOnMyG for being a multi accounting scammer I found his other account(s) after confronting him on Discord

[ComeOnMyG UID 4289210 multi accounting scammer](#)

If you go to Xaviest's thread where he is selling a method to get BTC you can see a vouch that was left by the user drankadranka [Hack Forums - Profile of drankadranka](#) supposedly having success with this method after purchasing it. Google his username and it will bring you to a Nulled profile selling similar betting shit and shitty ebooks.

[Screenshot by Lightshot](#) he deleted his post on the thread but the quote from it is still in the OP

I confronted him (ComeOnMyG) on discord asking if it was his Nulled profile and first claims its not his account and he doesn't know what Nulled is

I thought oh well it might not actually be him and then a little while later he messaged me saying that it was his account but there is nothing I can do about it because they don't get involved with HF stuff (this was after I had posted a community alert on him here)

What's interesting is after I found out that was his other HF account he deleted his vouch post on Xaviests thread which is really suspicious

So ComeOnMyG= drankadranka and most likely Xaviest or it's one of his friends account who he is leaving fake vouches on.

I already called him out in dms, he's Xaviest's friend and left a fake vouch, they own a discord together that dates all the way back to April

Doesn't surprise me. Before I had figured this out I was interested in the method but knew something was up when he sent me a different telegram account to communicate with him on through PM's (he had another one listed in his OP)
