Thread: [\[AI\] SMART SPORTS BETTING WITH AI | 83% SUCCESS RATE | MAKE MONEY](#)

Nob - October 7, 2019, 2:32 pm

Spreadsheet available here :

https://docs.google.com/spreadsheets/d/196Bk_42oa9Rr1E8V0myw2ZEXzC5J7IGMApDnYLMgdwc/edit?usp=sharing

Use the power of AI to invest safely in sports betting

How does it work ?

We are studying every sport to identify the most important variables associated with a team's victory. With these variables in hand, we're passing them to an artificial neural network that is able to weigh the invisible connections between those variables to predict with 83% accuracy the outcome of a game.

Do you have proof of what you are saying ?

You will find a link below where you will be able to look at your predictions spreadsheet. We cover NHL, NBA and MLB. We'll be adding more sports in the future, as we make new relationships with data providers.

What sports do you cover ?

As said previously, we actually cover the MLB, the NHL and the NBA, and starting from the end of the week or next week, we'll be covering the NFL and maybe tennis. More sports will be added in the future, of course.

How do I get the signals ?

We have a Discord channel aswell as a Telegram group, for the moment. As we evolve, tips will be available on a website and there will be SMS notifications.

I just checked your spreadsheet. There aren't many pronostics. Why ?

Our AI only selects the games that have the highest chance of being successful for us. Sometimes there are just not many games available. As we add sports, our global offer will grow, and you can expect to receive fresh pronostics every day.

I am interested. How do I proceed ?

First step is to make a contract. Accepted payment methods are PayPal, Skrill, Paysafecard, and any cryptocurrency available on Coinbase (BTC, ETH, BCH etc).

What is the price ?

Our costs are immediate and are not time-dependent. Our first step is to buy our own hardware to make our predictions, instead of sourcing the power from providers that are rather expensive. As such, there is no subscription, but only an entry fee.

That entry fee is 30\$

edited

Just took a look at spreadsheet. Are planning trying to add more daily bets?
Cause, at least for me, a \$170 profit after 3 months its not much.

Are you recommending using a \$20 stake on each bet? Or if i put \$50-70 on each will not be problem.

Nob - October 7, 2019, 10:30 pm

(Oct 7, 2019 08:44 PM)BocaJrs Wrote: [\[CITE\]](#) edited

More bets will be added as we get more sports up and running, and that takes a little time, but not that long.

You can put the stake you want, actually. You could put 10, 20 or 200\$ for that matter. You would have made 1700\$ profit with 200\$ base bet, and as there aren't many bets, you can actually get started with higher amounts easier.

KwikTrip - October 7, 2019, 10:39 pm

When you come out with NFL&NBA predictions is there any way
you would know how the success rate will be? Do you back-test?

Fish - October 7, 2019, 11:24 pm

Interested in this, waiting to see some vouches and I'll come back

Nob - October 8, 2019, 1:25 am

(Oct 7, 2019 10:39 PM)KwikTrip Wrote: [\[CITE\]](#) When you come out with NFL&NBA predictions is there any way

I will backtest the script with the 2018 season for both sports. Results should be available shortly.

I will send you a PM when it's available !

Deal - October 8, 2019, 1:28 am

Interested. Looking forward to seeing some vouches. A spreadsheet honestly ain't the best proof.

Nob - October 8, 2019, 2:03 am

(Oct 8, 2019 01:28 AM)Deal Wrote: [\[CITE\]](#) Interested. Looking forward to seeing some vouches. A spreadsheet honestly ain't the best proof.

Should I make a video of the algorithm at work as a proof ?

I might do a live broadcast when I'm testing it on the NBA's 2018 results.

Nob - October 8, 2019, 3:43 pm

First test on a limited sample of last year's NBA games showed 77% success rate. Accuracy should increase as we get more data !

Don't miss the livestream tomorrow where we will be back-predicting all the games of the 2018-2019 season !

bboyrican - October 9, 2019, 10:36 pm

Posting in here so I can remind myself to check it out later lol.... Talk soon!!

UberPete - October 9, 2019, 11:58 pm

Did you stop updating your spreadsheet?

Nob - October 13, 2019, 1:49 pm

Just updated the spreadsheet with two new sheets, extracted from my work on the last season of NBA.

What you must understand is that there aren't a shit load of pronostics because our algorithm is carefully picking them to maximize potential profit. Therefore it's only picking the safest ones, and it speaks of itself.

I couldn't post the pronostics for the full season because our provider doesn't have the odds before 2019/01/18, so I only posted a half season worth of pronostics.

I also added a high risk part, because we're actually doing really great on the high odds games, with 50% winrate on the games selected. Odds range from 4 to 7.5.

(Oct 9, 2019 11:58 PM)UberPete Wrote: [\[CITE\]](#) Did you stop updating your spreadsheet?

The MLB season is pretty much over, so I stopped. I just added the NBA part, and I'll be adding the NFL soon too. As we grow I hope that we'll be able to buy an access to soccer statistics so we can make really extend our pool of pronostics.

Juicy - October 13, 2019, 3:08 pm

Also interested in this as these are the sports I like. Lmk when NBA and NFL are available, is NHL going to be added as well?

Nob - October 13, 2019, 4:09 pm

(Oct 13, 2019 03:08 PM)Juicy Wrote: [\[CITE\]](#) Also interested in this as these are the sports I like. Lmk when NBA and NFL are available, is NHL going to be added as well?

NBA has just been added to our arsenal. The NFL will follow suit this week, and the NHL is on our priority list ! Thanks for your interest.

Southside - October 13, 2019, 4:56 pm

Forgot to ask.

\$30 entry fee, and no monthly membership, or how subscription works?

Thanks

xGuardian - October 13, 2019, 9:11 pm

Interesting, but no vouches and a random spreadsheet that isn't done properly :/

Any other "proof" you could provide?

Maybe give a 1 month test to a few people?

Digicult - October 14, 2019, 12:47 am

Is it possible to give a trial run first?

Nob - October 14, 2019, 12:58 am

(Oct 13, 2019 04:56 PM)BocaJrs Wrote: [\[CITE\]](#) Forgot to ask.

\$30 entry fee, and no monthly membership, or how subscription works?

ThanksIt is 30\$ for the entry fee and that's it. We might change our pricing model as we grow but it won't affect previous customers. The objective here is to end up covering all sports, everywhere,

which is pretty ambitious, so the price might change ^^

(Oct 13, 2019 09:11 PM)xGuardian Wrote: [\[CITE\]](#) Interesting, but no vouches and a random spreadsheet that isn't done properly :/

You've just hurt my feelings man. What is wrong with my spreadsheet ? Tried my best, even did conditional colouring, ahah.

I've made a video of how the algorithm works. I will try uploading it, if that can help. Problem of test months is that I already have customers from a previous thread, I feel like that wouldn't be fair to them. I can't refer them here as it's not the same thread and that would be violation of HF's policies.

(Oct 14, 2019 12:47 AM)Digicult Wrote: [\[CITE\]](#) Is it possible to give a trial run first?

I'm afraid not. As you can read above, I will post additional proofs, and I can send you a link to previous vouches in PM.

Digicult - October 14, 2019, 2:33 am

(Oct 14, 2019 12:58 AM)Urgo Wrote: [\[CITE\]](#) It is 30\$ for the entry fee and that's it. We might change our pricing model as we grow but it won't affect previous customers. The objective here is to end up covering all sports, everywhere, which is pretty ambitious, so the price might change ^^

I understand that, from the past results I'm seeing that the picks are really low ODDS which are pretty safe to bet anyways without needing any AI to tell me so, If you could maybe provide some bets with higher odds and >60% success in the future I might be interested ?

Nob - October 14, 2019, 4:32 am

(Oct 14, 2019 02:33 AM)Digicult Wrote: [\[CITE\]](#) I understand that, from the past results I'm seeing that the picks are really low ODDS which are pretty safe to bet anyways without needing any AI to tell me so, If you could maybe provide some bets with higher odds and >60% success in the future I might be interested ?As I've told you in PM, I wouldn't describe the odds as low as they are all above 1.4, atleast for the NBA. I can give you a truckload of examples of 1.4 odds failing just for today. Maintaining its performance over time is what differentiates the AI from any human operator.

We have a subsection of our NBA pronostics dedicated to risk taking. 50% win rate on 4 to 7.5 odds.

(Oct 16, 2019 01:39 AM)rogerand19 Wrote: [\[CITE\]](#) didnt get any PM man.....

Sorry, it was a conversation, not sure if you can access it. I sent you a real PM instead.

SIM-1808688 - October 16, 2019, 8:14 am

This is not to trash your thread, but by the looks of your spreadsheets it basically looks like you're betting on the team with the lowest odds (=the once with the highest chance to win according to the betting site) and on the high-risk spreadsheet you're basically just choosing the matches that has a huge margin in the odds(around +3 margin) which equals to just betting against the betting site's calculation on who is going to win.

This is equal to all the bets on the spreadsheet. By simple applying this method on my own, what does your product adds that is worth 30 usd? It's three months with this method and there aren't any exception.

Nob - October 16, 2019, 8:33 am

This is equal to all the bets on the spreadsheet. By simple applying this method on my own, what does your product adds that is worth 30 usd? It's three months with this method and there aren't any exception. The odds are added purely as an indication and to calculate the spreadsheets. When the games are predicted, the odds are not taken into account. They're added later on to make a net result money-wise.

As I increase the confidence threshold on my results, the games become safer to bet on, and often it is correlated with lower odds.

But thing is, more often than not teams that have the lowest odds lose. The approach I take is based on performance analytics. The odds on some pronostics might be low, especially for MLB as it was my first model and there's a lot to correct about it, I had to push the confidence pretty high when it shouldn't have been the case. I'm in the process of revising my analytics for the next season. I would argue that the odds on NBA games aren't low, as they're all above 1.4, benefiting from what I learnt from the MLB model. I would argue that you have perhaps not considered the nature of the service I am selling. There is no human decision making or pecuniary consideration when the games are selected. These games are safe not because their odds would tend to say so, but because a number of external factors actually have vouched for this pronostic.

I am not sure, but I don't know if you could pick odds above 4 19 times and still be right 50% of the time. It's not like all the games with a very high odds differential have been selected. Only a handful, where analytics have backed that there was a serious underdog situation.

I could go more into the making of of this whole AI, but then I would disclose elements that would be detrimental to my business because it would allow such an experiment to be repeated. I am sorry I cannot back it with anything else. If you wish so, I can add back the decision number that the algorithm gives to every game. I can say, however, that it will sustain the test of time.

Stanley - October 16, 2019, 1:03 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Nob - October 17, 2019, 9:22 am

We have added NHL pronostics and we have officially gone live with our very first pronostic yesterday ! New picks have been posted for today for our members.

Nob - October 18, 2019, 10:10 am

We're offering 2 more free vouches subscriptions lasting a week ! Contact me to get you up and running.

Deal - October 18, 2019, 10:40 am

Interested in seeing what this is all about.

Hey, interested in last VC.

Let me know if im capable for it.

Thanks ?

Pablo - October 21, 2019, 3:22 pm

Which payment accepts? BTC? or Credit Card? then im interested. taking vouch copie if u stil have any 1 available

Nob - October 23, 2019, 4:34 am

Had a great night tonight ! 100% of our pronostics were correct. We will soon be publishing NBA pronostics ! So what are you waiting for ?

Deal - October 24, 2019, 12:45 am

The seller is super friendly. And quite skilled.

I just finished my vouch period. The win rate is as promoted. His calls are well structured.

If I had bet 100 dollars each time I would have made a 180 dollar profit in this period.

Thanks for letting me try this.

StrikerICA - October 24, 2019, 1:43 am

Do you offer any more vouch copy ? How does this work ? Please PM or Discord.

Nob - October 24, 2019, 11:45 pm

(Oct 24, 2019 01:43 AM)StrikerICA Wrote: [\[CITE\]](#) Do you offer any more vouch copy ? How does this work ? Please PM or Discord.

Done so, thanks for your interest.

NBA pronostics will start on the 31 ! Take it while it's cheap !

SIM-4378207 - October 24, 2019, 11:47 pm

If you provide bet history (not spreadsheet) I will buy right f*in now!

The link is at the end of the main post actually ...

Southside - October 28, 2019, 7:31 pm

OP PROVIDED ME WITH A VC. HERE'S MY REVIEW:

Despite OP([Urgo](#)) is easy going to talk and provided everything we arrange in contract(vouching after 4 bets+).. i have to say his service is not good at all.

I dont really think an AI is "learning" and putting bets here, and this service is just based on OPs own "knowledge" about gambling and thats all.

And what is even worse, spreadsheet results are not completely true, as his avoiding most of lost results.

This [EXCEL RESULTS](#) doesn't reflect all(or at least around 82%) of his predictions.

Im on Discord server since Thursday 24th, and spreadsheet only shows 2 winning bets since then:

2019-09-25 DET MIN Away Win WIN 2,7 1,48

2019-09-26 DET MIN Away Win WIN 2,15 1,69

But he is avoiding all this ones already putted on Discord:

24/10 NY Rangers vs. Buffalo Sabres (LOST)

25/10 NJ Devils vs. Arizona Coyotes (LOST)

26/10 Carolina Hurricanes vs. Chicago Blackhawks (LOST)

26/10 Minnesota Wild vs. Los Angeles Kings (LOST)

26/10 Colorado Avalanches vs. Anaheim Ducks (LOST)

26/10 Winnipeg Jets vs. Calgary Flames (LOST)

28/10 Buffalo Sabres vs. Arizona Coyotes (LOST)

So after more than just 4 bets(i wanted to be sure about this service and not making a false statement or low quality vouch), i can definetely say this is a BIG NO to join in, or not at least for a

short period and low budget(as i would lost all my money based on my experience with his service).

Thanks OP for letting me try this, but i have to be completely honest and this are just my 2 cents about ?

rutsinsao - October 28, 2019, 8:28 pm

I interested .Work with cloudbet ?

There are things that are fundamentally flawed with what you've written.

First, you're pushing the idea that it is not relying on AI, which is a claim that is absolutely unfounded and that you have no way of proving. I can assure you that the entire process is automatic, except pushing those pronostics to the various communication channels, but that's a work in progress.

Second, you're using the wrong exemples. Why am I saying that ? You've been looking at the spreadsheet for the MLB 2019 pronostics, which is over as the postseason started, and used that to say that I'm not publishing the results that I might not be pleased with. I have not posted a single pronostic on the excel spreadsheet so far since the service has gone commercial, as I was intending on creating a new spreadsheet with current bets and updating it at the end of each month. Therefore you accuse me of fundamental dishonesty, but it's not even remotely true.

Third, I have always been straightforward on the various communication channels that the losing streak that happened on the 26 was very unlucky. It's not like I tried deleting all the Discord and Telegram messages so you would never had a proof that it happened. As we don't post a lot of bets per day, such streaks obviously are tanking our success rate on the very short term, but I can assure you that the winning percentage should go back up. I can even promise it. I have seen a linear relationship between the success rate and the confidence threshold of my predictions on two different seasons of NHL. There is no reason to believe that this season will be different. The sample size you're using to discredit my service is far too small to be statistically significant, if you were trying to prove that I'm just a liar. I would be more than happy to show you how to prove that I'm a charlatan, as I'm not, using distribution laws and χ^2 tests.

If you want a proof that I'm using AI, I am ready to make a live session to show you it is indeed AI. I can also show you that past results present on the spreadsheet weren't forged. When it comes to results, I invite you to stay around a little longer. And if needed, I'll make a tutorial, right here on HF, explaining how to use distribution laws to verify a claim such as the one I'm making. That might be a positive contribution to the entire forum if I enable people to check for themselves if some sellers' claims are accurate.

Nob - October 30, 2019, 10:45 am

I invite more people to come forward for vouch copies.
