Like your other method, if I order something \$13 I will only have to pay \$1?

This is somewhat different, the minimum order is \$15, so it will be \$3 plus another \$2 in taxes so something for \$15 will be around \$5.

How long would you think this to work for? Do you think this could be easily patched after a day? Lmk.

This guy is a joke. Reselling public method.

Also, once they find out about you abusing their service, they block your debit/credit card/Paypal/ApplePay.

If your method was so good, the 1 buyer you sold to would've already vouched for you, too bad he didn't; which already tells you how sht this method is.

Plus this is not even free food, you still have to spend money to get your discount (plus tips for the driver). If you're not tipping, you're a piece of sht.

I'd rather buy the UberEats discount service on here than buy this method for \$40 lol

Guys my method is completely new and not based on another method at all. It works perfectly and has been working for me for months. I test all my methods for months before I decide to sell them on this forum, just like my Doordash method.

Your card will not be blocked with my method you can use your payment info a infinite amount of times.

My method works perfectly and will continue to work for a long time, as Grubhub has no clue whats going on and how my method works.

This is not any type of bullshit referral method this is my own private method!

I will sell the next 2 copies for \$20 each, but YOU MUST GIVE A HONEST REVIEW!

Heres another proof picture.

Not just a perm ban, but a perm ban on all your payment method you use to pay with. Credit/Debit card, Apply Pay, PayPal etc. So if you expect to do this multiple times, goodluck on getting new cards everytime lol, it's a hassle and not even worth the price he's selling at.

"I'm saving 1000s month on food" lol nice lie. Stop exaggerating and acting like no one knows your method.

Your DoorDash method was \$100 and this is only \$40 and yet you're so desperate you'll even accept \$20? Goes to show how "good" this method is that you're saving 1000s in food lmao

Btw where's all the vouchers at? If they're saving so much money in food, shouldn't they be happy to vouch for you in this thread?

A liar just like your dad.

Why is it "\$12 or more"? How much discount can be received, on average? What causes it to vary?

Some restaurants in your area might have more specials so it can be 12 plus 5 more off or 12 plus 10 more off

Just paid OP a couple hours ago and I'm eating my first meal with this method as I type this. The method is legit, and works really good. IMHO it's a bit of an exaggeration that you can set it up in 2-5 minutes. It took me around 15, but I suppose with a lot of practice you could nail it down to 5.

Selling one more copy for \$40.

JakobF - January 26, 2020, 11:34 pm

Bought that last copy. Was able to get this done in around 15 minutes as well and I can see that this could be done if you're quick in under 10 mins. 5 mins might be a stretch, but possible.

I didn't meet all of the original criteria at first, but found a work around and verified with the seller quickly. This ended up fixing my original issue, so after that everything was smooth.

I only got a chance to try this once and I will likely update when I get this to work a second time, although I don't really doubt being able to do it a second time.

Nothing fishy happened with Grubhub nor the delivery; no need to contact support either.

Personally, I think it worked well and will be using this method a couple of times a month or maybe a week, but remember that you still do need to pay out of your own pocket a bit so make sure you have that bit covered!

Purchased the special priced vouch copy and here is my honest review.

Simple, took less than 15 minutes to set up, and works. Ordered breakfast this morning, turned a 21\$ order into 10\$. Easily Repeatable and after a few uses will definitely be well worth what the asking price is. Definitely advise you to get it while it's still relatively cheap.

Thanks again OP!

This seems interesting, but how the hell do you only have 9 business ratings after having this thread up for over a year, and 16 pages in length?

It's a sincere inquiry - I'm not trying to troll or be rude in any way.

Well I've had the price at over \$100 for the majority of this thread I recently lowered it a lot just to get some good vouches from users. After I sell 1 or 2 copy I'm re raising the price a bunch.

Cam - November 7, 2020, 10:20 am

Purchased OP's method and I can say it definitely works as advertised. I was able to get free delivery and \$10 off my order.

This has nothing to do with referrals either.

Took me around 10 minutes to set up my first time, but that's because I was reading the method itself while doing it. Once you're more familiar on the steps, I can see where you could set this up in 3-5 minutes each time.

Overall I'd say it's worth the purchase and you'd be making your money back after 3-4 orders with this method. You can't go wrong really. Thanks for the method, OP! I'm satisfied with my purchase.

I ordered twice already once for delivery and once for pickup. No issues.

I like that it doesn't involve refunding or making false claims etc.
