Thread: [Why isn't my HTML document linking properly to my CSS file?](#)

craigOwnsYou - October 8, 2019, 9:23 pm

So I try this HTML document I have been working on as presented in the video:

Code <!DOCTYPE html>

```
<html>
  <head>
    <meta charset="utf-8">
    <title>Amazon Checkout</title>
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <link rel="stylesheet" type="type/css" href="styling.css">
  </head>

  <body>
    <form>
      [b]<!--[/b]
      <label for="address">Address:</label>
      <input type="text" name="address" id="address" placeholder="Address" size="30px"
maxlength="100">
      <br />
      <label for="postcode">Postcode:</label>
      <input type="text" name="postcode" id="postcode" placeholder="Postcode" size="30px"
maxlength="100">
      <br />
      <label for="city">City:</label>
      <input type="text" name="city" id="city" placeholder="City" size="30px" maxlength="100">
      <p>Choose your shipping method:</p>
      <select name="shipping" id="shipping">
        <option value="Free super saver shipping">Free super saver shipping</option>
        <option value="Two-Day shipping">Two-Day shipping</option>
        <option value="One-Day shipping">One-Day shipping</option>
      </select>
      <p>Choose your payment method:</p>
      <label>Paypal<input type="radio" name="payment" value="paypal"></label>
      <label>Debit Card<input type="radio" name="payment" value="debit card"></label>
      <label>Credit Card<input type="radio" name="payment" value="credit card"></label>
      <br />
      <label for="comments">Comments:</label>
      <textarea rows="4" cols="40" name="comments" id="comments"></textarea>
      <br />
      <label>Sign me up for email updates<input type="checkbox" name="email updates"
checked="checked"></label>
      <br />
      <label>Securely save my payment details<input type="checkbox" name="save
payment" checked="checked"></label>
    </form>
  </body>
</html>
```

```
    <input type="submit" value="Submit">
  -->
  <div class="container">
    A
  </div>
  <div class="submit">
    B
  </div>
</form>
</body>
```

</html>

And here's the CSS code:

```
Code * {
  box-sizing: border-box;
}
```

```
body, html {
  margin: 0;
  padding: 0;
}
```

```
form {
  display: flex;
  flex-direction: column;
  height: 100vh;
  padding: 10px;
}
```

```
.container {
  background-color: greenyellow;
}
```

```
.submit {
  background-color: darkred;
  margin-top:auto;
}
```

Could someone please point out why it doesn't link properly to the CSS code? I really need help with this. I googled it and got someone else who asked and got an answer someone gave to that guy who asked and that person's answer didn't work.

I can't figure out why my CSS code just doesn't quite link.

Why isn't my code linking!? It makes no sense!!!

I fixed it!!!

Part of the css link was wrong.

Nachfolger - October 9, 2019, 4:51 am

I see that you fixed it, but I want to make sure it's obvious to everyone else.

Take note of the type attribute.

Code `<link rel="stylesheet" type="type/css" href="styling.css">`

Fixed code

Code `<link rel="stylesheet" type="text/css" href="styling.css" />`

Agreed. A Capital letter, a wrongly placed space, etc. can cause issues.

Valid

Code `<link rel="stylesheet" type="text/css" href="style.css" />`

Valid

Code `<LINK rel="stylesheet" type="text/css" href="style.css" />`

Valid

Code `<link rel=" stylesheet " type="text/css" href="style.css" />`

Valid

Code `<link Rel="stylesheet" type="text/css" href="style.css" />`

Heck, even this is valid

Code `<link rel=" Stylesheet " type="text/css" href="style.css" />`

Valid

Code `<link rel= "stylesheet" type="text/css" href="style.css" />`

You get the point. Don't spew nonsense just to rack posts up.

I'm talking generally. Not just in relation to one fucking line you giant dumbass.

So a capital letter doesn't affect selectors? A capital letter does not affect attributes? If his css is

called styles.css but he writes Styles.css that doesn't affect it?

Giant moron. Shut the fuck up who are you even
