Thread: [TorGuard VPN Port Forwarding + Rats](#)

trihex7 - October 9, 2019, 3:24 am

Hi There,

I'm just seeking some reviews from them who are using TorGuard or have used it in the past.

Thank you

Really good, using rn with no issues, been able to use the stealth proxy on top of connecting to a dedicated IP address with a port of my choice. Basically perfect for use with RATS

Recommended 100% if you like an easy-to-use GUI with several servers all over the world.
(and rating lol)

PIA is also good VPN and allows port forwarding.

if any one wants, I can provide one for cheap : <https://hackforums.net/showthread.php?tid=6101241>
