Message for the @. This was a genuine account that used NO botting whatsoever, it's been sitting gathering dust properly for about a year now. Last I posted a few months back to test for inactivity it got 400+ likes from it's existing followers. In it's prime it was pulling 700 likes at minimum (20 comments), typically 850-1,100 likes (35-60 comments) and the odd post hitting explore at 2,000+ likes.

BIN: \$45 BTC

Have no problem using a trusted MM and I'm happy to show whatever you would like to see. I built this account from scratch by hand.
