I started with my own company about two years ago. Earning at least 1k a day right now, pure profit (still have to pay the taxes).

I'm currently expanding it to other countries with a potential of earning 100k / month.

Glad to hear it's going good for you.

Good luck on your future savvy.

Good job man , really nice for you

may I ask what do your company do?

Lorem Ipsum - October 10, 2019, 6:29 am

That's amazing. 1000 euro's a day is a lot of money, especially when claiming it is all profit.

How are your thoughts on expanding the business? Also, no need for it, but do you have any screenshots or perhaps pictures to motivate the rest of us to keep grinding?

That's insane. I plan on starting a business when I'm older but I also feel it's unrealistic. Hopefully I can follow your footsteps!
