Thread: [Who can teach me how to create GMB\(google my business\) listings.](#)

Bulma - October 10, 2019, 1:29 am

Hello,

I am looking for person who could teach me how to create a GMB(google my business) listing without having address. I need to create at least 1-3 listings per day. So please if someone can teach me how to create GMB without any issues, contact me. Best would be if I could create GMB in US, CA, AUS,UK.

Thanks

Google will allow you to set up the listing and hide the address, but you will 100% need an address to initially create a GMB.

yes, you will absolutely 100% need an address for each listing and be able to receive mail there.

you are wrong, mate. It possible to verify without a postcard.

Dont need anymore, found what i was looking.

thanks!
