Thank you. I wanted to make sure I showed this hard evidence before he tried to cover his tracks. I'm happy to sacrifice losing \$18 to prevent someone from potentially losing much more. Hopefully action is taken on this scammer/ban evaders account.

funny to cause he is not using contracts at all.

Honestly, I'm not even doing a deal dispute since for 1, I didn't do a contract. and for 2, I proved he is ban evading on account that went on a scam spree. If this proof doesn't get him banned I will be shocked.

Yeah it deactivated when I used an HWID spoofer. I've tried every method I found on google but it always keeps appearing :(

It's the same thing.. look it up if you don't believe me. At least in the US, a hash tag can also be called a pound sign.
