Thread: [\[CHEAP AF\] Building Bots/Programs For \\$5 With Python!](#)

Captain Pre - October 11, 2019, 3:24 am

I feel unmotivated when building useless Programs/Bots. So I wanted to build real stuff!

Things I can do :

- 1) Web automation
- 2) Full Proxy Support
- 3) Command Line Interface
- 4) Gui's (Haven't made a project on it still, so might take time)
- 5) Bypass captchas

Feel free to ask if you want something not listed above

Things I have made :

- 1) Proxy Scraper
- 2) Sign up bot
- 3) Web Automation Projects

Will accept payments after completion

I will finish projects as quickly as possible and give you the source code for absolutely free!
Hopefully, you get what you want and I learn a few things by helping you!
Price is Fixed at \$5 BTC

Bought a simple bot from him, works well.

Will be getting more!
