Thread: [Is 4,5k unique visitors per 24 Hours bad or good?](#)

duck - October 11, 2019, 6:50 am

What can be done with this amount of visitors?

Alexa ranking of the domain is under 160k as of now (11 oct, 2019)

1 visitors usually stays on the website for more than 5 minutes. [Legitimate Visitors only !! No bots, No bought traffic].

It's alright, but is this with seo or without? Have you placed ads or anything for traffic or 100% organic?

Not exactly sure what do you mean with seo or without. (I have not so much of a knowledge)

I try to maintain my seo, i have robots.txt, sitemap, keywords, description etc, not sure if I shall do some more.

I try to make it as much as user friendly, responsive and fast and lately I was improving it to achieve the highest score here <https://developers.google.com/speed/pagespeed/insights/> (but it's pretty random, once it says 86 , the other time I test it, 79, the second time 96). Quiet confusing.

I have no ADs anywhere, people usually go either from Google (or any other search-engine) or they simply know the link, so they access it directly.

I wonder how to improve it as much as possible but I think I already did everything, I improved my Sitemap and the alexa ranking went down (improved) by 30k in 1 day, I had wrongly placed some links. :facepalm:

Alexa ranking is now around 152k (12 oct)

I also bought small amount of backlinks, nothing serious, just few of them to see how does that go. They were likely shitty but I don't think it makes any difference or worsen the SEO unless they are totally used for spamming etc.

In that case you do have a great amount of visitors coming in, but your niche also matters. Overall, I'd say those are some good numbers.

Pretty decent bounce rate and 160,000 on Alexa is a decent rank tbh. 4500 visitors is good. Interested in your niche since you don't seem to be overly proficient in SEO and have decent stats.

I guess you are ranking on a keyword without competitors, otherwise you wouldnt get that many traffic if you dont know how to seo.

I recommend you to apply to AdSense ASAP, you're losing a lot of money every day.

Its very good, but it depends on the Niche. Are the things free?

Yes and no.

You can get free stuff but you can also pay.

135k visitors/month is good mate! A lot of your questions are really hard/impossible to answer without having a look at the site or at least knowing the niche tho. If you want I can take a look, just sent me a PM.

The average is around 4to 4,5k right now, unique per month is less than that according to my analytics but above 100k, yeah.

if they are organic its very good

(Oct 25, 2019 04:46 PM)cRaZyzMaN Wrote: [\[CITE\]](#) if they are organic its very good yup, legit, organic traffic.

not sure if its worth purchasing any traffic, i know it can boost up your rank a lot. I know I could purchase thousands of back-connected residential proxy pool but i prefer legit visitors, if the bad / fake traffic stop, you'll also slowly drop. Yes in some cases it can help but not always.

I also feel happier if I can achieve it without "cheating".

if you are having good amount of sales, purchase now some ads

Ganja - October 26, 2019, 3:20 am

if you're going after ads, be sure to use retargetting as you probably have enough data to realise a high conversion rate.

Don't get fake traffic, it won't help in the long run. If you want to grow even bigger just focus on quality content, a good user-experience and get a couple of GOOD backlinks (one good backlink is waaaaaaay better than 10000 shitty ones).

duck - October 26, 2019, 6:50 am

I'm not really after after ads, bought few backlinks and yeah, i agree otherwise.

Depends upon the niche.

For Adult this traffic is not so much.
But for affiliate it could be good enough.
I guess you have many webpages with different keyword slugs and 500+ words on them.
Thats why you are ranking for no-competetion keywords and getting these 4-5k users per day.

not adult traffic

i thought of affiliate but probably not, the site itself makes money from the products being sold or provided.

i dont really have many webpages with many keywords not even that much of a text.

It's plain and simple, no long articles or texts.

Hou muchmoney we talking if its \$100+ for that traffic then its all good.

Mind Disruptor - October 27, 2019, 7:48 am

If they don't purchase anything why you need the traffic? Except if you have ads and they click to them.
